ABOUT THE Academy

The Academy of the Social Sciences in Australia (the Academy) promotes excellence in the social sciences and in their contribution to public policy. It coordinates the promotion of research, teaching and advice in the social sciences, promotes national and international scholarly cooperation across disciplines and sectors, comments on national needs and priorities in the social sciences, and provides advice to government on issues of national importance.

The Academy is an independent, interdisciplinary body of leading social scientists recognised for their distinguished contributions to the nation. Established in 1971, replacing its parent body the Social Science Research Council of Australia (founded in 1942), the Academy is an independent, interdisciplinary body of elected Fellows. Fellows are elected by their peers for their distinguished achievements and exceptional contributions made to the social sciences across eighteen disciplines.

The Academy is an autonomous, non-governmental organisation, devoted to the advancement of knowledge and research in the various social sciences.

The Academy is comprised of four Panels of Fellows, each comprising several disciplines:

- **Panel A:** Anthropology, Demography, Geography, Linguistics, Sociology, Management.
- **Panel B:** Accounting, Economics, Economic History, Marketing, Statistics.
- **Panel C:** History, Law, Philosophy, Political Science.
- **Panel D:** Education, Psychology, Social Medicine.

MESSAGE FROM THE

President

The Academy acknowledges the traditional owners of the land on which our office stands, the Ngunnawal people, and pays our

respect to leaders, past, present and emerging. We acknowledge and respect the continuing cultures, languages and heritage of Aboriginal and Torres Strait Islander peoples.

This is my first year as President and I reflect on the past few months with a great sense of the importance of scholarship and the significance of the contribution of the social sciences to contemporary society. A great deal of attention is given to the importance of STEM disciplines in solving society's challenges and equipping people for the workforce of tomorrow. But STEM is harnessing only half of human knowledge; the social sciences and the humanities are at least as important.

The Academy purpose is what it always has been but we have taken the opportunity of developing a new strategic plan to restate our purpose: to recognise and champion excellence in social science. We have made an explicit statement of our values: excellence, independence and integrity. We are also making a commitment to acknowledge and respect Aboriginal and Torres Strait Islander peoples and their traditional knowledge. This means the Academy Executive Committee and National Office Team will work with our ATSI Fellows to turn this commitment into action.

The strategic plan has been developed by the Executive Committee and it will be presented for endorsement at the Annual General Meeting. The Academy is its Fellows. This year we have welcomed 36 distinguished scholars into the Fellowship. It is pleasing to see greater representation of female scholars, and now 1/3 of Fellows are female. The Academy has also recognised four new Jubilee Fellows, who have achieved 40 years of Fellowship. Congratulations to Professor Robert O'Neill AO, Emeritus Professor Richard Selleck, Emeritus Professor Peter Sheehan AO, and Mr Bob Wallace.

This report details our activities and financial results for the 2018-19 year. The Academy's activities include workshops, public forums, public lectures, roundtables and commissioned reports. Fellows have generously given their expertise and their time to support Academy activities. We thank you all.

I want to extend my deep thanks to the outgoing President, Professor Glenn Withers. Glenn has led the Academy into more active advocacy to harness social science knowledge in addressing key social issues. The publication of the Academy report, *The Social Sciences Shape the Nation*, in mid 2017 is a landmark document detailing the immense contribution to Australia life. Glenn played a key role in the Academy's contribution to the Securing Australia's Future Program. Glenn also led significant changes in the structure of the Australian Council of Learned Academies (ACOLA) and these changes should ensure a stronger basis for co-operation and collaboration across the Academies. It is very fitting that we recommend to the Annual General Meeting the award of Honorary Fellowship for Professor Withers.

To say this has been a year of change would be an understatement. The Academy lost its longstanding Executive Director, Dr John Beaton, in November 2018. John had steered the fortunes of the Academy for 17 years, ensuring the strong position – our standing in academia, the goodwill of our Fellows, and a strong financial base – we have today. The Academy has awarded Honorary Fellowship to John in recognition of his own scholarly contributions to the social sciences, notably anthropology, and his support for the Academy. I wish to express our enormous thanks to the national office team who worked so hard in the aftermath of John's sudden death to ensure the Academy remained functioning particularly through the busy period of our annual symposium and related events. Liz West returned from maternity leave to lead the team through such a difficult period and I pay tribute to her commitment to the Academy.

I want to welcome Dr Chris Hatherly into the position of Executive Director. Chris comes to us from the Australian Academy of Science where he was Policy Director. Chris was previously National Research Manager at Alzheimer's Australia and has held other roles in government and non profit organisations. Chris holds a PhD in psychology from ANU. He has a clear appreciation of the value of the social sciences and the role of learned academies.

In Memoriam

This year, the Academy has mourned the loss of Emeritus Professor Patrick Troy AC, Emeritus Professor John Victor Prescott, Professor Eric Richards, Professor Ross Day, Professor Mardi Dungey, and long-standing Academy Executive Director and Honorary Fellow Dr John Beaton. While we miss them, we are appreciative of their contributions to the social sciences. The Academy extends its condolences to their families, colleagues and friends.
Vale.

Donations

Donations from Fellows and others are one of the important ways that ASSA seeks to fund its mission and provides us with a level of flexibility to fund innovative solutions for achieving our aims. We thank those who have made donations to the Academy this year for their generosity: Emeritus Professor Joe Isaac, Emeritus Professor Keith Hancock AO, Emeritus Professor Anne Edwards AO, and Professor Yoshihisa Kashima.

Acknowledgments

I wish to thank all the members of the Executive Committee for their time and support. Professor Wai-Fong Chua has joined the Executive in the role of Treasurer and particular thanks go to her for continuing developments in our accounts to make them consistent with modern practice. I would also like to thank Professor Sharon Roach Anleu (Panel A Chair), and all other outgoing Committee members for their service.

The National Office team has supported services to Fellows and managing a growing range of Academy activities and programs. There seem to ever more opportunities for policy, advocacy and public activities inviting ASSA participation. So on behalf of the Executive Committee and the full Fellowship thanks to Chris Hatherly, Liz West, Alice Balnaves-Knyvett, Michelle Bruce, Dylan Clements, Rosemary Hurley, Mick Morris, and Anna Dennis.

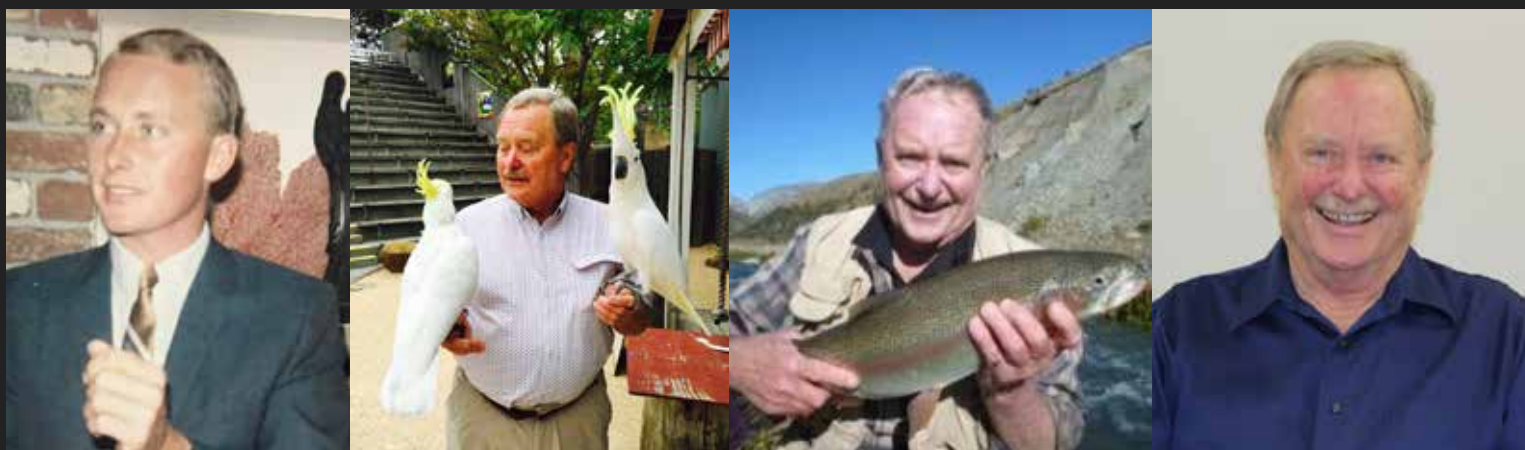

The following pages expand on the highlights and full activities for the year. Enjoy reading.

Professor Jane Hall
Academy President

In Memory of Dr John Mark Beaton (1944-2018)

Dr Beaton served as the Academy's Executive Director from 2001 until his sudden and untimely passing on November 6, 2018. Vale.

MESSAGE FROM THE Executive Director

2018 was a year of change for the Academy.

The passing of long-standing Executive Director Dr John

Beaton in November was a devastating and untimely loss to the Academy, to John's family and to his many friends and colleagues. A debt of gratitude is owed to John for almost 18 years of service at the helm of the Academy, as well as to Academy staff – in particular Liz West – who ensured the success of the Annual Symposium and related events just one week after John's passing.

On the recommendation of the Executive Committee, Fellows attending the AGM on 14 November, 2018 voted unanimously for the posthumous award of Honorary Fellowship to Dr John Beaton in recognition of both his scholarship in the field of anthropology and his significant contribution to the social sciences in Australia through governance of the Academy.

Vale.

The Academy welcomed 36 new Fellows to its number in 2018. This represents a success rate of 56% of nominations received - disappointing of course to those not elected, but consistent both with previous years and with the esteemed status embodied in Fellowship of one of Australia's Learned Academies.

It is worth noting that in for the first time in the Academy's history more women than men were both nominated (58%) and elected (53%) in 2018; increasing the proportion of female Fellows to 33%. While the Academy has further to go on gender equity and in other areas of diversity and inclusion, it is well ahead of other Academies in Australia on gender balance and ahead of most other science-based Academies in the world.

The 2018 Academy Symposium on regenerating trust and integrity in public institutions was highly topical in the current

political environment and was well received by those attending.

It's pleasing to report that the symposium has generated continued interest as well, with the convenors Professor Adam Graycar FASSA and Dr Adam Masters running a successful workshop on the topic with public servants in Canberra in October, 2019.

A full report on the Symposium will be published at the time of the 2019 Annual Symposium.

The 2019 Symposium will focus on the critical and challenging topic of saving people and the planet. Convenors Professor Sharon Friel FASSA and Dr Ashley Schram from the ANU, and Professor Christine Parker from Melbourne University have developed an outstanding program and we look forward to welcoming many Fellows and other colleagues to Canberra in Melbourne.

2018-19 saw the continued success of the Academy's public lectures, forums and workshop programs. Highlights included:

- Immediate Past President Professor Glenn Withers AO FASSA delivering a wide-ranging 2018 Cunningham Lecture on the pursuit of knowledge
- Professor John Quiggin FASSA exploring the future of work in the 2019 Keith Hancock Lecture
- An expert panel discussing the value of experts in the post-truth world during the 2018 Peter Karmel Forum (conclusion: we're more important than ever!), and
- Paul Bourke Awardee Dr Daniel King delivering a fascinating and disturbing talk on 'gaming disorder'.

The Policy and Advocacy Committee had a busy year, with 12 submissions to government inquiries and reviews summarised in this report.

Key and ongoing areas of policy focus for the Academy include social science research data

infrastructure, research funding generally, policy action on climate change, access to public information through archives and other repositories, and performance metrics for research and innovation.

The Academy has also continued to contribute through its Fellows to important policy-related projects through the Australian Council of Learned Academies (ACOLA) with notable reports on Synthetic Biology and Artificial Intelligence released during the year.

The Academy's international program continued to achieve good outcomes; our continuing partnership with the Chinese Academy of Social Sciences supporting four new projects and a refreshed collaborative research program being negotiated with the Embassy of France in Australia.

The Academy has continued its role as host of the Asian Association of Social Science Research Councils (AASREC) and as of September 2019 has assumed the Association Chair (our International Secretary Professor James Fox FASSA) and agreed to host the next AASREC biennial conference in 2021.

Looking ahead, the Academy will release its 2019-2022 Strategic Plan at the Annual Symposium in November 2019. The plan sets out a program of activities aimed at drawing on the expertise of the Fellowship to provide

an influential voice on key policy issues, on diversifying our communication activities, and on continuing to improve Academy processes and procedures. The Plan also commits the Academy to a priority focus on inclusion and engagement of Aboriginal and Torres Strait Islander peoples in the social sciences. I look forward to reporting the preliminary outcomes next year.

Finally, a note of thanks to my colleagues in the National Office Michelle Bruce, Alice Balnaves-Knyvett, Dylan Clements, Rosemary Hurley, Mick Morris and Anna Dennis who have put in an enormous effort to maintain the programs of the Academy during a time of significant change. Thanks also to colleagues Liz West, Sunny Hutson, Jennifer Fernance and Phillip Mackay who have taken up new challenges beyond the Academy during the year.

Public Forums & Communication

The Public Forums and Communication Program aims to raise awareness of the social sciences within the community, among policy-makers and opinion leaders, and to highlight the relevance of the social sciences for public policy. It does so by organising public lectures, the Annual Symposium, states-based Fellows events and managing the Academy's media activities.

PUBLIC LECTURES

The **Cunningham Lecture**, the Academy's flagship annual public lecture, is named after Dr Kenneth Stewart Cunningham, the first chairman of the Social Science Research Committee (the Academy's predecessor organisation). The Cunningham Lecture is presented by an eminent social scientist, and occurs as part of the Annual events, immediately following the Symposium. It is open to the public. Attendees traditionally include a diverse mixture of people including academics, officials, diplomats, and a wider interested public. Recent Cunningham Lecturers have included Professor Glenn Withers AO FASSA, Professor Peter Shergold AC FASSA, The Hon Dr Kay Patterson AO PSM, The Hon Andrew Leigh MP FASSA, and Professor Bruce Chapman AM FASSA.

The **Keith Hancock Lecture** honours Professor Keith J. Hancock AO, an eminent labour economist and social scientist who served as President of the Academy for the period 1981 - 1984. A graduate of Melbourne University and the London School of Economics, Professor Hancock has held a number of important positions including: Foundation Professor of Economics at Flinders University; Deputy President of the Australian Conciliation and Arbitration Commission; Senior Deputy President of the Australian Industrial Relations; and Professorial Fellow in the National Institute of Labour Studies. He is one of two Australians who are Honorary Fellows of the London School of Economics.

The **Paul Bourke Lecture** is named in honour of the late Paul Francis Bourke (1938–1999), eminent historian and President of the academy from 1993–1997. Amongst scholars the contribution Paul Bourke made to the field of performance measurement is considered to be invaluable. The lecture is presented each year by the recipients of the previous year's Paul Bourke Awards for Early Career Research at the lecturer's home university and is open to the public. The Paul Bourke Medal honours Australians in the early part of their career who have achieved excellence in scholarship in one or more fields of the social sciences.

The **Fay Gale Lecture** honours the late Professor Gwendoline Fay Gale AO (1932 – 2008), the Academy's first female President (1997 – 2000). Professor Gale was an eminent human geographer. She was well known for her contributions to academia, the advancement of women within academia, Indigenous Studies and juvenile justice. To honour Professor Gale's contributions to both the Academy and the social sciences, the Academy each year invites a distinguished female social scientist to present the Fay Gale Lecture. As part of the Academy's outreach efforts, the lecture is traditionally delivered once at the University of Adelaide's Fay Gale Centre, and then once in the speaker's home University/Institution.

The **Peter Karmel Forum** in Public Policy was introduced in 2013 in honour of the late Professor Peter Karmel AC, CBE (1922 - 2008), a past President of the Academy (1987-1990), who had a profound impact on higher education and public policy in Australia over many decades. Professor Karmel was an active member of the Academy of the Social Sciences in Australia from his election in 1952 and continued to contribute to public discourse, particularly in education, throughout his life.

MEDIA STATISTICS

The Academy is active on social media, communicating via Twitter, LinkedIn, Facebook and YouTube. At the time of reporting the Academy had the following level of engagement:

Twitter: 1,435 Followers

LinkedIn: 153 Followers

Facebook: 91 Followers

YouTube: 17 Subscribers + 67 videos

2018 Fay Gale Lecture

Decolonising Artificial Intelligence?

Presented by Professor Genevieve Bell

The idea of Artificial Intelligence (AI) was codified at a conference in the American summer of 1956. It was summarised to mean the attempts to “make machines use language, form abstractions and concepts, solve the kinds of problems now reserved for humans, and improve themselves.”

That initial formulation, a product of a particular time and place, has framed a great deal of research ever since. But what exactly is AI in 2018, and why does it loom so very large in our conversations about the future? In this talk, Professor Genevieve Bell explored the ways in which AI, and our imaginings of it, could be subject to an anthropologically inspired set of interventions.

2018 Paul Bourke Lecture

Gaming Disorder: Meeting the challenges of a new disorder

Presented by Dr Daniel King

Digital devices and online media have become integral to young people's lives, and have enabled new opportunities for socialisation, creativity, and learning. However, 'always-online' lifestyles and the constant accessibility of smartphones and other electronic devices have also led to excessive digital technology use and related mental health issues.

At the same time, online activities such as eSports and entertainment streaming have popularised the act of committing to continuous engagement in video-gaming activities for some young people. Australian data on excessive gaming indicate that 4.1% of adolescent boys play video games for an average of 9 hours or more on an average weekday, and 7.8% play for an average of 9 hours or more on weekend days. Further, 4.4% report going without eating or sleeping in order to play games; feeling upset if they cannot play; spending less time with family or friends or not doing schoolwork due to gaming; and trying unsuccessfully to reduce their gaming time.

In recognition that some people become problematically involved and a smaller proportion develop an addictive relationship with video games, 'Gaming disorder' and 'Hazardous gaming' are now officially recognised in the International Classification of Diseases (ICD-11). Online gaming is a complex phenomenon with unique features that pose challenges for researchers, clinicians, parents, and policymakers to develop effective approaches to reduce problematic gaming.

This lecture discusses some of the latest international research on problematic gaming and gaming disorder. The focus is on conceptualisation, research on epidemiology and risk and protective factors, and screening and intervention approaches.

View the lecture here: <https://www.assa.edu.au/event/2018-paul-bourke-lecture-dr-daniel-king/>

2018 Peter Karmel Forum

Experts? Who needs 'em? – Promoting the Value of Expertise in Decision-Making in Australia's Future

Panellists: Ms Sarah Burr, Professor Linda Botterill FASSA, Associate Professor Carolyn Hendriks, Professor Deborah Lupton FASSA

British MP Michael Gove recently said, "I think the people have had enough of experts with organisations from acronyms saying that they know what is best and getting it consistently wrong". With integrity and trust in institutions at an all-time low, his comments reflect a society feeling fed up with experts who are out-of-touch.

This forum examined how experts can effect positive change and remain relevant in a post-truth society. What can we do to ensure those with the power to make the decisions that will shape our future are equipped with the necessary knowledge and research (particularly in relation to the social sciences) to give our nation the best shot and restore public confidence?

View the forum here: <https://www.assa.edu.au/event/2018-peter-karmel-forum/>

Professor Deborah Lupton, Associate Professor Carolyn Hendriks, Professor Linda Botterill, Ms Sarah Burr, Dr Michael Wesley.

2019 Keith Hancock Lecture

The Future of Work

Presented by Professor John Quiggin FASSA

The outcomes of technological change are affected by the interaction of changes in the regulation of labour markets and the stance of public policy. For

the last 40 years, changes in labour market regulation have been almost uniformly anti-union and anti-worker, while public policy has been premised on the desirability of reducing wages. Until and unless the stance of public policy changes, technological change will be experienced by workers as harmful disruption. Used in a socially desirable way, however, technological change offers the potential for a radical improvement in work-life balance.

2018 Cunningham Lecture

The Pursuit of Knowledge: Veritas Redux

Professor Glenn Withers AO.

Presented by Professor Glenn Withers AO FASSA

Humans are ascendant because of rational knowledge. In this Lecture the nature and standing of contemporary knowledge creation, testing and transmission will be examined. Achievement will be celebrated, but failure and challenges will be recognised.

Examining the consequential core issue of the state of education and research across the globe will then follow, and how that must be defended and advanced as the very foundation for the future. Especial attention will be given to Australian tertiary education and to the state and role of the social sciences.

Specific guidance on the way forward for a better future in a post-truth era will be offered, as will specific cases ranging from immigration to gender equity and cyber security, in order to underpin the broader analysis.

View the lecture here: <https://www.assa.edu.au/event/2018-cunningham-lecture-the-pursuit-of-knowledge/>

2019 Peter Karmel Forum

Understanding Politics and Policy through a Values Lens

Panellists: Professor Linda Botterill FASSA, Professor Brian Head FASSA, and Professor Julie Lee

This forum will discuss the insights that can be gained from thinking about politics and policy through a values lens. Our lives are guided by sets of values that underpin our evaluations of good and bad, right and wrong, and what should or should not be. These values have their origins in an individual's upbringing, their religion, societal norms, and their lived experience.

Values are deeply held and hard to shift and they guide not only individual behaviour but also inform judgments about the appropriate functioning of society. Recognising the role of values has important implications for politics and policy, highlighting the limitations of rational, value-free models of the policy process.

A values perspective draws attention to the inherently political nature of policymaking, and acknowledges its essential messiness, uncertainties, and conflicts around goal identification, problem definition, and instrument choice. This forum discussed how a political values perspective can enhance our understanding of political conflict and the policy process.

View the forum here: <https://www.assa.edu.au/event/2019-peter-karmel-forum/>

Book Launch

Judges, Judging and Humour

Editors: Dr Jessica Milner Davis and Professor Sharyn Roach Anleu FASSA

This book examines social aspects of humour relating to the judiciary, judicial behaviour, and judicial work across different cultures and eras, identifying how traditionally recorded wit and humorous portrayals of judges reflect social attitudes to the judiciary over time.

It contributes to cultural studies and social science/socio-legal studies of both humour and the role of emotions in the judiciary and in judging. It explores the surprisingly varied intersections between humour and the judiciary in several legal systems: judges as the target of humour; legal decisions regulating humour; the use of humour to manage aspects of judicial work and courtroom procedure; and judicial/legal figures and customs featuring in comic and satiric entertainment through the ages.

Delving into the multi-layered connections between the seriousness of the work of the judiciary on the one hand, and the lightness of humour on the other hand, this fascinating collection will be of particular interest to scholars of the legal system, the criminal justice system, humour studies, and cultural studies.

 Professor Brian Head, Professor Linda Botterill, Professor Julie Lee.

Annual Symposium

Regenerating Integrity and Trust in Australian Institutions

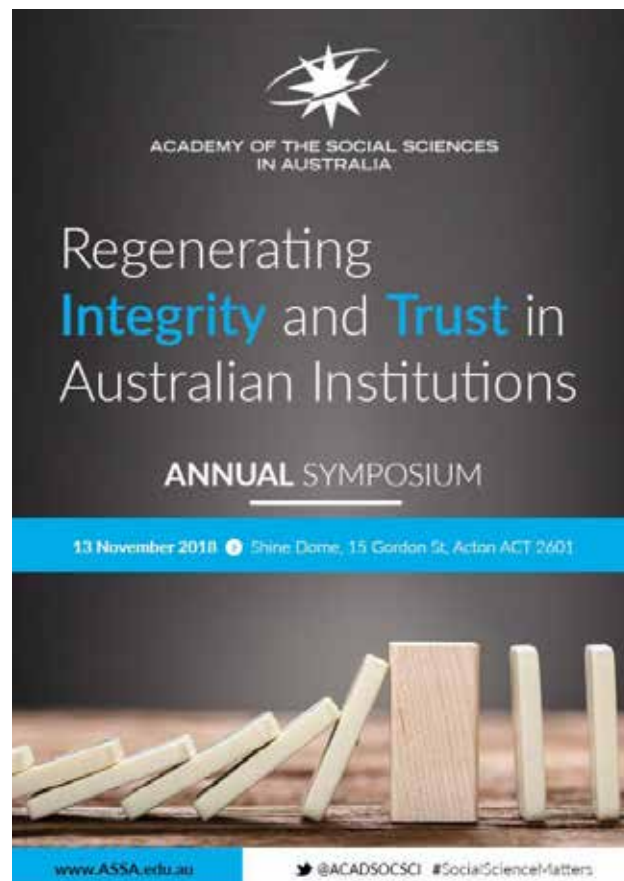

Convened by Professor Adam Graycar AM FASSA and Dr Adam Masters

The Fellows of the Academy of the Social Sciences in Australia recognise and respond through their disciplines to matters of national concern.

In its 2018 Annual Symposium the Academy brought social science insights to bear on the loss of trust in public and private Australian institutions which poses unacceptable risks to our civil society. Media sources have been quick and persistent in identifying everything from incompetence to malfeasance in the institutions that we have come to trust. Our banking system, our government, our educational institutions, religious organisations, charities, businesses, professional sports... all have been found wanting in ways that lessen our trust in them, make us cynical and threaten our hope for the future.

Can trust be restored, by what means, and how long might be required to regenerate the trust that a civil society depends upon?

 Crowd at the 2018 Annual Symposium held in Canberra.

Policy & Advocacy

ASSA recognises and advances excellence in social science. This is true for pure social science research, like that of philosophy or history, and for applied research, like that of public health and political science. Applied research often has policy implications or an explicit policy focus, and success in this kind of social science research depends on its policy relevance and applicability. It is the purpose of the Policy and Advocacy Program to develop this research into policy positions or recommendations, and to advocate for the developed policies which come out of this research.

ASSA's policy development and advocacy efforts have reactive and proactive dimensions. The main priority in its reactive work is the development of submissions in response to Senate or Government inquiries, or reviews conducted by government departments or agencies. These submissions draw on the expertise of ASSA's fellowship to develop policies and make recommendations to the inquiries or reviews which would promote excellence in social science research, or which represent the implementation of the findings of social science research in public policy.

The main priority in its proactive work is the coordination of policy roundtables, which aim to bring together research expertise and policy influence. Roundtables take questions of public significance, and commit to developing concrete policies for addressing them out of up to date social science research. This represents a chance for outstanding researchers to seriously flesh out the policy implications of their work in a hardnosed way and to the degree required by policy actors, and a chance for policy actors to flesh out concrete policies in a way which meaningfully incorporates the relevant expertise and knowledge. Policy actors are not restricted to politicians or their advisors and public servants, but include decisionmakers in business, business regulation, community groups, NGOs, and the union movement.

In addition to running policy roundtables and making submissions, ASSA's policy development and advocacy activities include a range of meetings and representations conducted under the banner of its government engagement plan, including events with the Parliamentary Friends of the Social Sciences. This group aims to engage directly and develop relationships with parliamentarians and their advisors on a regular basis.

Excerpts from the following ASSA submissions to enquiries can be found in this report:

- Response to National Research Infrastructure: Humanities, Arts, and Social Sciences Scoping Study (September 2018)
- ASSA Response to Medical Research Future Fund Consultation (August 2018)
- ASSA Response to Australian Public Service Review: The Australia Public Service and the Social Sciences (July 2018)
- ASSA Response to the New Australian Government Data Sharing and Release Legislation (August 2018)
- Response to the Department of Foreign Affairs and Trade's Soft Power Review (September 2018)
- ASSA Response to Performance-Based Funding for the Commonwealth Grant Scheme Discussion Paper (February 2019)
- ASSA Response to the National Regional, Rural and Remote Education Strategy Framing Paper (February 2019)
- Research and Australia's Future: 2019-20 Pre-Budget Submission (February 2019)
- ASSA's response to the Implementation of the National Science and Research Priorities under the Australian Research Council's National Competitive Grants Program Review (April 2019)
- ASSA Response to Department of Industry, Innovation and Science Consultation Paper on Improving Innovation Indicators (May 2019)
- ASSA Submission to the Tune Review of the National Archives of Australia (June 2019)
- ASSA's Election Statement: The Social Sciences Shape the Nation (May 2019, Full)

Full Academy submissions can be read here: <https://www.assa.edu.au/category/submissions/>

National Research Infrastructure: Humanities, Arts, and Social Sciences Scoping Study (September 2018)

Investment should support leading-edge research and innovation and be accessible to publicly and privately funded users domestically and internationally. Following is a summary of recommendations what we propose to be a Social Science Scoping Study that would form a part of the broader HASS Scoping Study:

1. A. The development of a stand-alone Social Science scoping study, as a component of the broader HASS Scoping Study, which recognizes the interoperability of social science data and the achievements and potential of systems such as: the Australian Data Archive (ANU); Commonwealth government generalized survey and administrative data investments as described in the Government's 2013 Essential Statistical Assets and 2015 Public Data Policy Statement; and specialized data assets such as the longitudinal datasets funded by the Department of Social Services and managed by the National Longitudinal Data Centre.
2. An integrated data management environment, having the following attributes:
 - Data storage facilities (such as National Computational Infrastructure and Research Data Services) providing high availability and large-volume data storage and back-up facilities.
 - Secure access facilities (such as the Population Health Research Network and the ABS Microdata Laboratory).
 - Data linkage (through Statistical Data Integration Authorities), and data integration and interrogation environments (such as the Australian Urban Research Infrastructure Network).
 - Accredited Data Authorities which build on the responsibilities of integrating authorities to provide advice and technical services, such as data cleaning, deidentification, linkage and safe release.
 - Data discovery services (such as Australian National Data Service) to enable data discovery through shared platforms and services such as Digital Object Identifiers.
 - Sufficient data protection and security through the Five-Safes Framework
3. A stable long-term preservation and curation environment.
4. D. Effective access for bona-fide researchers, including: i. capabilities for open data download (data.gov.au) and mediated data access (Australian Data Archive) ii. Availability of secure access environments (such as PHRN and the ABS Data Lab) iii. Machine-to-machine data access. iv. National protocols for data sharing, access and utilisation such as the new Data Sharing and Release Act.
5. E. Soft infrastructure in support of innovation in research methods, such as the use of probability-based sampling methods for online surveys, experimental methods for behavioural economics, and data science methods for description, classification and prediction to enable new forms of research data collection and analysis to be established and supported.
6. F. Capacity building to promote knowledge of legislative frameworks, methodologies, datasets and technology and infrastructure use throughout the sector.
7. G. Adequate training for researchers and data providers in the new platform including provision of expert archival assistance to facilitate access.

Medical Research Future Fund Consultation (August 2018)

ASSA responded to a Medical Research Future Fund consultation, which was undertaken to inform the second Australian Medical Research and Innovation Priorities 2018-2020. In it, ASSA made recommendations for investment in the application of behavioural economics, building evidence in primary care, and disruptive technologies.

Australian Public Service Review: The Australia Public Service and the Social Sciences (July 2018)

This submission examines the capability, culture and operating model of the APS, and makes the following eight practical recommendations to help ensure the APS is ready, over the coming decades, to best serve Australia in: driving innovation and productivity in the economy; delivering high quality policy advice, regulatory oversight, programs and services; tackling complex, multi-sectoral challenges in collaboration with the community, business and citizens; ensuring our domestic, foreign, trade and security interests are coordinated and well managed; improving citizens' experience of government and delivering fair outcomes for them; acquiring and maintaining the necessary skills and expertise to fulfil its responsibilities:

1. Given a series of earlier reviews of the APS, the review panel should assess the extent to which the recommendations of these previous exercises in self-reflection have been implemented, and the reasons for both successes and failures.
2. Researchers perceive the Council of Australian Governments (COAG) as currently lacking the support systems and the strategic focus, including a relevant research base, needed to address the challenging tasks that the country requires. We recommend that COAG structures, processes, and advisory capacity be augmented to give it more independence of the Commonwealth government, and the administrative heft to match the importance of its role.
3. There should be consideration of how to promote inter-sectoral research-policy cooperation, and better understanding on each side of the imperatives to which the other must respond. This could be the catalyst for jointly-created and broad-based intellectual eco-systems, and 'encompassing groups' to serve as advocacy coalitions for practical policy development. We suggest (a) the secondment of relevant research experts to particular departmental policy teams for specific projects; and (b) the short-term secondment of individuals from within the APS to identified research teams within Universities for a period.
4. The ANZSOG model—currently oriented towards academics training public servants in institutional and organizational dynamics and policy case studies—should be extended to offering training to academics in how to engage with policy agencies.
5. APS departments should maintain an updated register of immediate priorities and emergent issues in their domains with which researchers could match their research interests.
6. APS departments should introduce 'research champion' roles within their management teams. Such research champions should (a) identify and develop relationships with relevant external experts; and (b) initiate roundtables or forums for the APS on policy issues of concern to the service, in collaboration with external research professionals.
7. The APS must pay close attention to the costs and benefits of outsourcing, its impact on policy capacity, on institutional memory and the means of honing its message in the competition for government attention.
8. The government should establish of a comprehensive integrated HASS Data Platform, in order to drive transformations in the way researchers discover, access, curate, and analyse social and cultural data.

ASSA commends the Australian Government on its commitment to improving Australia's use of data as a key opportunity to substantially enhance national productivity. The importance of improving data use practices extends well beyond questions of national productivity to questions of wellbeing and national progress. Making data more available is an achievable reform and would liberate economy-wide productivity improvements over many years. We welcomed the release of the Australian Government Public Data Policy Statement in 2015, and the recommendations of the Productivity Commission in its Data Availability and Use Inquiry in 2017. The proposed new legislation is an important step in reforming and enhancing access to public data in Australia. Three important issues not raised in the Issues Paper are the need to upgrade the capability in the Australian Government, and more generally, in respect of:

1. The analysis of large and imperfect data sets including linked data sets.
2. The management of these data sets and the design of the underlying systems.
3. Managing the security of these data sets (or at least knowing when to call in the experts).

This submission affirms the importance of soft power, and recognises education and research are important instruments for this power. In addition, it stresses that comparative advantage for deployment of soft power should be sought and should be enhanced. Social science education and research are examples of this potential. At present they are underutilised. Specific recommendations to better utilise the potential of the social sciences are as follows:

1. Consider complementary use of income-contingent loans to fund business research and development.
2. Deploy the Education Investment Fund to build public health supportive social science research infrastructure.
3. Improve and Correct Impact and Engagement metrics to reflect good social science practice.
4. Create an Indo-Pacific Regional Academic Collaboration Fund.
5. Invest in a Fund promoting the development of international collaboration programs.
6. Create a funded social science research program to analyse the possible comparative advantages implicit within Australia's education and research institutions.
7. Expand and rebalance Australia's research funding arrangements to also support social science methods on an informed and complementary basis.
8. Develop an explicit soft power strategy for advancement of Australian tertiary education best practice in institutional and systems operation.

Performance-Based Funding for the Commonwealth Grant Scheme Discussion Paper (February 2019)

ASSA shares the commitment to enhance university teaching effectiveness, deliver good outcomes for graduates, and achieve equity in attainment rates across Australia, including in the regions. However, the proposed Performance-Based Funding for the Commonwealth Grant Scheme is articulated in a way which cannot guarantee these outcomes, and indeed may lead to adverse unintended consequences. The Academy recommends the Scheme be deferred until extensive consultation with all stakeholders has been completed, and rigorous analysis of it by relevant social science experts demonstrates the likely effectiveness of the Scheme, or the lack thereof. If the Scheme is implemented nevertheless, it should explicitly recognise and assess the likelihood of adverse unintended consequences of the metrics proposed, and then be implemented in a modified form founded on the proper analysis of the metrics proposed and their likely effects. The best intentions of this Scheme could be achieved through the better policy of increasing overall university funding through mechanisms that do not require significant outlay nor micromanagement of universities. Recommendations to this end are summarised below:

1. Delay implementation of the Scheme until significant consultation with the experts, including members of this Learned Academy, has been completed—and only implement it if the evidence points clearly in the direction of effective and positive impact.
2. Restore all funds cut from the Research Support Program and commit to a robust framework for university funding in order to enable universities to operate effectively.
3. If the idea of the Performance-Funding Scheme stands up to proper expert scrutiny, it should be implemented in a form which addresses evident problems in student survey and employment outcome metrics. To achieve this, the Expert Panel should consult directly with the relevant experts for conceiving and applying accurate metrics.
4. Increase overall research investment by committing to clear steps towards lifting Australian R&D investment from its current

low rate of 1.88% of GDP to match the OECD average of 2.4% by 2025, with the longer-term specific goal of reaching the current OECD Best Practice frontier of 3% by 2030.

5. Consider an income-contingent loan scheme for university-business research and development partnerships.

National Regional, Rural and Remote Education Strategy Framing Paper (February 2019)

The stated aim of the National, Regional, Rural and Remote Education Strategy is to build capacity, develop educational opportunities, support students, and increase access in rural, regional, and remote areas. This is an ethically upright and financially prudent goal. To achieve this goal, however, ASSA recommends the following policy changes:

1. Delay significant education policy changes until there has been genuinely comprehensive consultation with the relevant experts.
2. Restore all funds cut from the Research Support Program, and commit to a robust framework for research funding in order to enable universities to operate effectively and conduct their best and most innovative research across the system.
3. Increase overall research investment by committing to clear steps towards lifting Australian R&D investment from its current low rate of 1.88% of GDP to match the OECD average of 2.4% by 2025, with the longer-term specific goal of reaching the current OECD Best Practice frontier of 3% by 2030.
4. Consider an income contingent loan scheme for university-business research and development partnerships based in regional, rural and remote locations.
5. Deployment of the immigration points system, with sufficient social science guidance, to aid the Inquiry's objectives.
6. Ensure a proper evaluation process into the effectiveness and legitimacy of the regional, rural and remote education package.

ASSA suggests most strongly the Australian Government be a champion of research and development. A greater national commitment to research and development (R&D) is a proven way to develop a strong foundation for securing Australia's future. More and better research support is an investment which contributes handsomely to fiscal sustainability—and much more. ASSA recommends that the Government:

Articulate a Strong Vision: commit to clear steps towards matching the current OECD average for R&D as a share of GDP of 2.4% by 2025, and the current OECD Best Practice frontier of 3% by 2030.

Seize Simple Available Options: deploy already available endowment funds for research infrastructure, including for social innovation through research in areas such as disability and health.

Utilise Existing Expertise: draw on the combined expertise of the Learned Academies in designing grant processes for enhanced national benefit.

Display Ingenuity: underpin research investment aspirations by implementing a new innovative income-contingent loan scheme for R&D that will partner universities with industry.

These four steps would contribute greatly to a budget strategy that delivers growth with equity and sustainability. ASSA stands ready to assist with further development of these policy initiatives.

ASSA makes the following four recommendations to enhance the ARC grant allocation processes:

1. That the ARC engage ASSA to undertake a further investigation into the distribution of research funding, and research activity and performance, which encompasses:
 - Research grant patterns across all disciplines.
 - Discipline matching data in peer review.
 - Cost of publication or citation by discipline for ARC grant funded research.
 - Any wider research available in Australia or overseas on matters of conscious and unconscious bias in application and selection systems.
2. That the ARC acknowledge the need for the development of a broader set of metrics that better reflects the public value of innovation in all its forms. ASSA is available to assist in this task.
3. That the ARC develop a protocol for the continued usage of standard impact metrics including the following criteria:
 - Recognition of books and book chapters.
 - Weighting co-authorship of journal articles on a proportional basis.
 - Consideration of the effect on articles in journals which publish at a higher rate proportionally.
 - Introduction of interdisciplinary 'exchange rates' or similar to account for the impact of comparative disadvantages inherent within cross-disciplinary comparisons.
4. That the ARC continue to refine the definition of the National Interest Test, in consultation with the Learned Academies and their expert Fellows.

ASSA recommends to the Taskforce a more explicit recognition of and action toward the development of a complete set of metrics that quantify the full public value of innovation in all its forms.

The nature and impact of social innovation are perhaps not as easily measured as those associated with technological innovation. But such measurement is not only desirable, but necessary in any comprehensive suite of innovation metrics. There is no conceptually valid basis for distinguishing between technological and social innovation when aiming to evaluate the impact of innovation for the purposes of its enhancement.

The best policy is formed on the basis of socially innovative research, including analysis of the economic, social, and cultural benefits of different policy options. Good policy and decisions about public investment must comprehend the economic and cultural impact of social innovation. For instance, it would be economically valuable to know how much the development of Medicare, which obviated the need for a healthcare system like that in America, has saved taxpayers—including all this means for health outcomes and the attendant economic advantage this provides. This kind of evaluation and quantification of the impact of innovation—both technical and social—is one of the important skills of social science, and an area in which there is research and knowledge.

These metrics, used well, are far more apt than common use of aggregate input metrics such as grants received. Some improvement comes from relating input cost to simple output measures such as cost-per-publication or cost-per-citation metrics, but this too misses the wider complexity of impact beyond the Academy. Partial measures that look to measure outcomes beyond narrow outputs are a little better still, such as cost-per-patent for related sciences, but this still falls short of the full public value metric ASSA wishes to see used in this area. The concept of public value that we suggest includes economic, environmental, and social dimensions, as well as including distributional impacts.

The National Archives of Australia is an important asset for the collection, preservation and dissemination of our national stories. The state of the Archives is therefore a concern to many individuals and groups in Australia. Foremost among these are historians. In this submission to the Tune Review of the National Archives of Australia, ASSA makes five recommendations:

1. Amendments to the Archives Act (1983) which took effect 25 April 2019—imposing a 25-item cap on applications before the period that the Archives has to respond to the applications can be extended unilaterally by the Archives—should be reversed.
2. Increase the human resources budget of the Archives to address current infeasible wait times for clearance of open period files.
3. Implement a ‘time limit’ for departmental responses, whereby requests are taken as approved in cases where the Archives do not hear from the government agency to which the response was put within three months.
4. Seek broad policy guidance from government agencies on what can be released to researchers without the need for consideration of each individual request. Only complex or very sensitive records, rather than all records as such, should be considered on a case by case basis.
5. In line with recommendations made by the Australian Historical Association, use of an independent public body charged with assessing which records should be made publicly available—like that used in the UK (the Advisory Council on National Records and Archives)—should be seriously considered. This body would represent the public interest and would follow the UK example in ‘regularly challenging government departments to provide evidence to justify requests for permission to retain documents or for them to remain closed’.

ACADEMY OF THE SOCIAL SCIENCES
IN AUSTRALIA

2019 Election Statement

SHAPING THE NATION

● ● ● ● ● ●

Australia must prepare today for tomorrow's challenges - from climate change and social well-being to technological adaptation and an evolving economy. For policymakers to do this, they must have consistent access to the best research and knowledge from the social sciences in addition to that from the humanities and arts (HASS), as well as science, technology, engineering, and maths (STEM).

Historically, Australia's policymakers have done this very successfully, using social science research in the development and implementation of some of Australia's great programs - including compulsory superannuation, HECS, parental support systems, Medicare, crime prevention, disability support, and the immigration points system. This is to name only a few social science innovations which have contributed greatly to the prosperity of the nation.

The Academy of the Social Sciences in Australia calls on the next Government of Australia to redouble its commitment to support the social science research which underpins policy development, and the connection of research with policymakers.

We have identified **FIVE** steps to achieve these goals.

Academy of the Social Sciences in Australia 2019 Election Statement

1 PROPERLY INVEST IN HIGHER EDUCATION AND RESEARCH

Australia's higher education and research system performs very strongly. This is despite being underfunded relative to comparator OECD countries. Australia invests 1.88% of its GDP in research and development - by contrast, the OECD average is 2.4%, and the OECD best practice frontier is 3%.

Australia risks underinvestment in research, which is an essential foundation for economic and social progress. Enhancing overall research support has a multiplier effect on the economy, extending knowledge infrastructure, promoting technological innovation, and creating skilled jobs. Research overall currently pays a real return on investment of around 20%. Improving the university ecosystem as a whole has natural flow on positive effects for education and graduate capacity. All parts of the education network need proper support by public funds.

Increase overall research investment by committing to clear steps towards lifting Australian research and development investment from its current low rate of 1.88% of GDP to match the OECD average of 2.4% by 2025, with the longer-term specific goal of reaching the current OECD best practice frontier of 3% by 2030.

2 IMPLEMENT INNOVATIVE POLICY FOR RESEARCH FUNDING

There are limited direct linkages between government funded research and industry in Australia. The best policy ideas offer ways to address this, including through the use of income contingent loans to promote research and development. This scheme would provide loans to start-ups, requiring industry-university collaboration for funding, and ensure a return to the public purse from the investment made—not only from general economic uplift, but also from direct loan repayment, should the enterprise be commercially successful.

Linking the scheme to well-managed organisations in the form of universities ensures proper selection procedures and financial oversight. It also provides a mechanism for mentoring and assistance. This instrument could be implemented during a time of budgetary restraint, while at the same time enhancing financial sustainability for the future.

Implement an income-contingent loan scheme for university-business research and development partnerships.

3 INVEST IN SOCIAL SCIENCE DATA INFRASTRUCTURE

Industry, community organisations, and government all require good quality data and research to deliver their missions. The social sciences are responsible for a large amount of this data collection and research, and this has been expanded with the integration of artificial intelligence and emerging technology. The economic value of open data in Australia is estimated to be \$64 billion.

Academy of the Social Sciences in Australia

It is not presently possible to make the whole qualitatively diverse and quantitatively extensive range of data available in an open environment. The data are scattered through the public sector, as well as among organisations, collecting institutions, and individual researchers and projects. All in all, only a small amount of the data congenial to academic and policy research is supported by the infrastructure which would make them useful and accessible. Efforts to develop infrastructure have been directed to individual researcher and institution-level priorities, and currently much infrastructure for HASS data has been project-based and operates at an institutional level. Data infrastructure is uncoordinated and minimally integrated.

Australian data infrastructure is desperately in need of increased support - it is insufficiently funded and does not have the capability to handle the anticipated data quantities of the future. Hand in hand with better infrastructure is the necessary training in data analysis, research ethics, and legal frameworks necessary for researchers to access and use data in an ethical way. To sustain the infrastructure underpinning this research, adequate investment is crucial.

Support and develop integrated Humanities, Arts and Social Sciences data platforms with effective and supported researcher access, and comprehensive legal and ethical research training.

4 STABILISE RESEARCH FUNDING

Universities require a stable and predictable policy and funding environment to flourish and produce their best research and education. Absent this stability, universities cannot be ambitious and innovative in their research, given the long-term nature of university research and training.

This stability has historically existed, and changes have been sufficiently evolutionary in the past. This led to the well-documented excellent performance of Australia's higher education and research system. However, a recent trend of ad hoc policy changes and funding cuts have had the blanket adverse unintended consequence of undermining this stability. This has eroded the confidence of researchers and institutions, and in turn undermined the preconditions for good research.

Recent cuts to the Research Support Program have kicked the ladder out from under good inquiries and threatened the most ambitious 'blue sky' research. Cuts to the Higher Education Participation and Partnerships Program (HEPPP), Australia's flagship program for low SES accessibility, have been repeatedly taken despite the program's exceptional success and popularity. Unreliable career prospects have seen only minimal increases to the number of Australian domestic doctoral candidates in recent years.

Restore all funds cut from the Research Support Program and commit to a robust long-term framework for research funding, in order to protect the university ecosystem from external disruption and enable it to focus internally on producing its best and most innovative research.

Academy of the Social Sciences in Australia 2019 Election Statement

5 IMPROVE RESEARCH FUNDING METRICS

Good research funding policy and processes rely on the ability to measure the real effect research has in the world. Public funding is allocated on the basis of these measurements, so designing the right research and innovation metrics is crucial.

Substantial research and knowledge regarding the proper evaluation and quantification of the impact of innovation—both technical and social—is a key social science skill. The best and most advanced metrics developed out of this research are more accurate than commonly used aggregate input metrics, such as total grants received. Metrics relating input cost to simple output measures, such as cost-per-publication or cost-per-citation, fare only slightly better. Partial metrics that look to measure outcomes beyond narrow outputs, such as cost-per-patent for related sciences, provide moderately improved accuracy.

But in the last analysis, these still fail to accurately measure the true impact of research on society and fall well short of the full public value metric we wish to see used in this area. We suggest a public value metric which accounts for economic, environmental, and social impact, as well as properly accounting for distributional impacts. Such a public value metric could be applied across all the social science, humanities and arts, and science and technological fields.

Examine the best methods for demonstrating the social and economic benefits of innovation and develop a full public value metric for use in research funding administration.

International Activities

Through its international activities ASSA aims to facilitate international scholarly collaboration and intellectual exchange through its International Program. The international program connects Australian social scientists with their overseas academic counterparts. It also acts as the Australian national member of international organisations

Joint Action: Australia and China

The International Program coordinates a regular program run in conjunction with the Chinese Academy of Social Sciences: the ASSA-CASS Joint Action Program. This is a competitive grant program jointly funded by ASSA and CASS, sponsoring up to four projects each year. Successful applicants are awarded \$7,000 AUD to be shared by the Australian scholars and ¥25,000 RMB to be shared by the CASS scholars. The grants contribute to air travel, accommodation, and conference-related costs. The program aims to provide Australian and CASS researchers the opportunity to collaborate in areas of shared interest. It is suited to younger researchers who wish to pursue research opportunities with an international colleague, with the intention this may lead to larger research projects.

The strong relationship between ASSA and CASS was extended with the MOU between the organisations being extended from one to three years, in recognition of the stability of the relationship and program. Four new grants were provided for collaborative research projects for 2018. Outcomes and other observations from the research project are publicly available on ASSA's website.

Each project produces a 2,000 word article summarising the context of the research question, the outcomes of the research, and directions for future research. Four grants were provided for collaborative research projects for 2019.

Excerpts from the following projects can be found in this report:

- Ageing in a Foreign Land and a Homeland
- Regulating China's Distant Water Fishing in the Polar Regions
- Optimal Policies to Promote the Adoption of Renewable Energy Technologies in Australia and China
- China's Internet Innovation and Governance in the Xin Jinping Era: Big Initiatives Power Dynamics and Global Impacts

The Association of Asian Social Science Research Councils (AASSREC)

Set up in 1973 to help promote the social sciences in the region and to create an Asian identity for the social sciences, AASSREC seeks to promote:

- collaborative research among scholars in the region
- the exchange of scholarly publications and information among Asian social science institutions and individuals, and
- exchange visits among researchers and scholars from its member-countries.

In 1975, AASSREC held its first conference in Tehran, Iran, where its constitution was adopted by the four founding member organisations:

- Indian Council of Social Science Research
- Philippine Social Science Council
- Korean Social Science Research Council, and
- National Research Council of Thailand.

AASSREC's regular activities include:

- the conduct of biennial general conferences and the publication of conference papers and proceedings
- the conduct of collaborative research programs on specific problems of common interest to Asia-Pacific countries, and
- the assessment of trends in social science research and teaching in the Asia-Pacific region.

The 23rd AASSREC Biennial Conference is currently scheduled for September 2019, to be held in Hanoi, Vietnam. ASSA continues to act as Secretariat for this important initiative.

Ageing in a Foreign Land and a Homeland

Dr Shuang Liu (UQ) & Dr Lei Wang (CASS)

We know that ageing well is important to health and reduces long-term costs for society. Yet, the pathway to successful ageing is far from clear. This project aims to identify the enablers and barriers for older Chinese people to age well in Australia and China, thus addressing Priority Topic 3 (Population and/or Migration). We will: 1) Collect and analyse secondary data from Australian Bureau of Statistics and Chinese Bureau of Statistics to identify the relationships between demographics (e.g. age at migration, education, housing conditions, residential areas, etc.) and well-being of the two groups of older Chinese (65+); and 2) Interview a sample of participants from both groups to collect primary data on perceived health status, quality of life, belonging, sense of home, and well-being. Expected findings from this comparative study will inform the development of government policies to facilitate successful ageing in a foreign land and in a homeland.

Regulating China's Distant Water Fishing in the Polar Regions

Dr Nengye Liu (University of Adelaide) & Dr Hongyan Liu (CASS)

The Project examines the state, adequacy and effectiveness of Chinese legal regimes for distant water fishing in the Arctic and Antarctica (Polar Regions). The Project will be conducted through doctrinal and qualitative (interviews) research with Chinese policy makers, marine scientists and fishing industry representatives. It aims to generate effective legal systems for Chinese distant water fishing vessels to achieve sustainable conservation, management and exploitation of marine living resources in the Polar Regions in an era of climate change and declining marine ecosystems. The completion of this project will contribute to the preservation of the polar marine ecosystems for their intrinsic worth and also for the many ecosystem services they provide.

Optimal Policies to Promote the Adoption of Renewable Energy Technologies in Australia and China

Dr Chi Truong (Macquarie University) & Dr Wei Wei (CASS)

Emission from fossil fuel consumption has degraded local environment and contributed to the global warming problem. Renewable energy such as wind and solar is clean and can be used sustainably as substitutes for fossil fuels in Australia and China. Adoption of these renewable energy technologies by private sector, however, may require subsidies from the government, at least in the initial years when technology costs are high. We will examine the optimal allocation of limited government funding for subsidies towards solar and wind energy technologies, taking into account the diminishing marginal returns to renewable energy capital. We use Australia and China as two case studies to illustrate the application of our framework.

China's Internet Innovation and Governance in the Xin Jinping Era: Big Initiatives Power Dynamics and Global Impacts

Dr Jian Xu (Deakin) and Dr Weishan Miao (CASS)

The project examines the policies, politics, debates and impacts of China's 'Internet plus' and 'Internet sovereignty'—two biggest initiatives in Internet innovation and Internet governance in the Xi Jinping era. By adopting a critical political economy approach, the project studies the policymaking of the two Internet Initiatives as 'political-economic construction' and 'geopolitical struggle' and critically analyses the multifaceted power dynamics among state agencies, corporate actors, civil society, China's political rivals and allies that have influenced the policymaking and implementation of the two ongoing plans.

The project explores the characteristics of China's state-led Internet innovation and state-centered Internet governance and compares their differences with the Western democrats. Research findings of the project is conducive to understanding the digital transformation of the Chinese economy, China's Internet policies and politics as well as the global Internet governance and cybersecurity.

Workshops

One of ASSA's mechanisms for promoting excellence in social science research is its Workshop Program. The Workshop Program aims to realise the benefits of bringing together those at the forefront of social science research by sponsoring and coordinating academic workshops. These workshops present an opportunity for social science researchers to share ideas and discuss arguments face to face with one another, which often the ordinary course of things does not throw up. The workshops emphasise breadth of perspectives and ideas by drawing on practitioners—including policy makers and government, community groups, business and business regulation, NGOs, and the union movement—earlier and later career researchers, ideas from multiple disciplines, and researchers from different organisations. This helps to facilitate the establishment of research networks for future collaborative work.

The main function of the Workshop Program is the coordination of a regular program of up to ten workshops each year. This is a competitive grant program designed to fund workshops engaging 20 experts for two days of discussion and debate. In order to create the conditions under which participants are willing to let their guard down and push each other, these workshops are invitation only and conducted under the Chatham House rule. However, workshops do result in materials for public consumption.

Convenors of workshops arrange the produce of an analytical summary of the topic and discussions over the course of a workshop, which is a public document displayed on the ASSA website. Workshops also tend to result in further publications, such as books or edited collections, or articles published either in academic journals or in media like the Conversation. When workshops have a policy focus, ASSA encourages participants to develop policy statements out of workshop discussions.

Find out more: <http://www.assa.edu.au/events/workshops/>

Excerpts from the following ASSA Workshops can be found within this report:

- Advocacy for Energy Transitions: Mapping the Dynamics
- Gender and Trauma: 1945 to the present
- Regulating Consumptagenic Systems
- Technology and Domestic Violence: Experience, Perpetration and Responses
- Australian Indigenous Self-Determination: Past Practices, Future Options
- Understanding Crime and Rural Communities

Advocacy for Energy Transitions: Mapping the Dynamics

Associate Professor Tom Morton, Professor Heather Goodall, Professor Linda Connor, & Associate Professor James Goodman

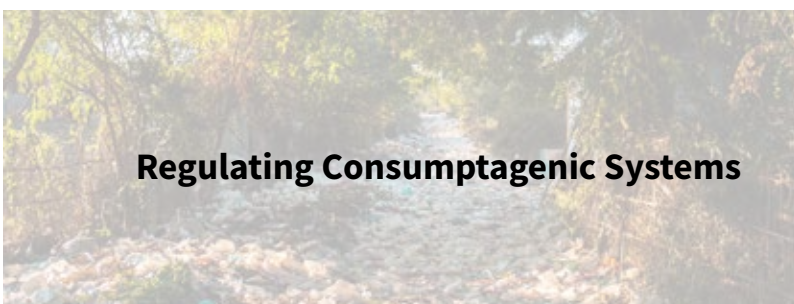

The workshop explores the landscape of advocacy for 'energy transition', identifying diverse actors and strategies. Energy transition is driven by global climate policy, and signals a decisive shift away from reliance on fossil fuels to a varying mix of renewable energy. The workshop aims to shift the focus beyond technocratic questions to consider the social, political and economic forces driving transition. Participants across disciplines, along with leading policy analysts, will address emerging agendas, including issues of energy justice, just transition and energy democracy. The workshop will create theory-policy linkages, and lead to a special issue of an academic journal.

Gender and Trauma: 1945 to the present

Professor Christina Twomey & Associate Professor Paula Michaels

How is Post-Traumatic Stress Disorder (PTSD) gendered? Most sufferers of PTSD are female, while research focuses on male combat soldiers. Drawing on history, sociology, anthropology, and psychiatry, we will explore how gender has shaped the definition and treatment of trauma across time and place. The major objectives are to: identify key moments when gender has informed theories and treatments of trauma; examine and account for gendered specificities in women's and men's experiences of trauma; analyse the role of gender in narratives of trauma. The workshop's main outcome will be an unprecedented interdisciplinary volume on the nexus of gender and trauma.

Regulating Consumptagenic Systems

Professor Sharon Friel, Professor Valerie Braithwaite, & Dr Ashley Schram

Excess consumption by industrialised societies is harming human health and destroying the planet. The proposed workshop aims to enhance the understanding of the ways in which policy and social structures encourage excess human consumption, and the implications for population and planetary health. Drawing on a plurality of theoretical perspectives and empirical cases studies, the workshop will explore ways of regulating systemic and individual level behaviours in order to reduce excess consumption and ultimately improve population and planetary health. A research agenda will be developed that focuses on the regulation of consumptagenic systems.

Understanding Crime and Rural Communities

Dr Alistair Harkness, Dr Naomi Smith, Dr Bec Strating, & Professor Rob White

A growing body of scholarly investigation of rural crime has been motivated by governmental, community and academic recognition that, despite stereotypes and images of a 'rural idyll', crime exists in the rural landscape. This workshop will bring together leading scholars, and early- and mid-career researchers, to expand understandings of rurality, narratives of crime, engagement of rural communities to reduce and prevent offending in rural places, and to comprehend more clearly the dimensions of rural crime and appropriate policy responses. It will culminate in a special edition of an international peer-reviewed journal and a full-length monograph with an international publishing house.

Technology and Domestic Violence: Experience, Perpetration and Responses

Dr Bridget Harris, Professor Kerry Carrington, & Dr Delanie Woodlock

Domestic violence (DV) is widely recognised as one of Australia's most important social issues, with approximately one woman killed by her partner, weekly. This workshop will bring focus to an emerging trend in DV: the use of technology to stalk and abuse victim/survivors. Landmark studies have been conducted in Australia that have highlighted the significant impacts on wellbeing and risks to safety associated with this violence, but as yet there is no consensus in regards to the definitions, effects, legal and judicial remedies and social responses. By bringing together scholars, practitioners and technology experts, this workshop will produce knowledge that will improve policy and practice in protecting and empowering victims, with the ultimate aim of preventing this under-recognised violence from occurring.

Australian Indigenous Self-Determination: Past Practices, Future Options

Professor Tim Rowse & Dr Laura Rademaker

The workshop addresses an issue of national importance: the position of Indigenous Australians in Australian society. Drawing on anthropology, political science, legal studies, sociology, linguistics, geography and history, the workshop will both describe what was done in the name of self-determination and reveal historically contingent definitions of self-determination. Case-studies of Indigenous communities, policies and programs will reveal the varied public policy implications of the doctrine. Participants have combined working for Australian governments and for Indigenous organisations with University-based research and teaching. The results of the workshop will include evidence-based policy recommendations, to be disseminated publicly in book form.

Fellowship & Awards

Paul Bourke Award for Early Career Research

Dr Emma Hutchison, Dr Tamsyn Rheenen, Dr Renee Zahnow with their Paul Bourke Award medals.

Dr Emma Hutchison

The University of Queensland

Dr Emma Hutchison is one of the outstanding Australian international relations scholars of her generation, internationally renowned for her research on emotions in world politics. Her first book, *Affective Communities in World Politics* (2016), was published in the prestigious Cambridge Studies in International Relations series, and has since won the 2017 Susan Strange Book Prize from the British International Studies Association and the 2018 Best Theory Book Award from the International Studies Association. Her highly cited articles in leading journals, such as *International Theory* and *International Political Sociology*, quickly established her as a leading

voice in a new wave of scholarship on the role emotions play in shaping world politics. This was acknowledged recently by the premier journal *World Politics* when it commissioned her to co-write one of its prestigious review articles, a first for an Australian scholar. In 2017 Dr Hutchison won an Australian Research Council Discovery Early Career Research Award (DECRA), which follows her receipt of a UQ Research Fellowship (2016-2019), and a UQ Postdoctoral Fellowship for Women (2014-2016). In 2018 she won a UQ Foundation Research Excellence Award, the University's highest honour for Early Career Researchers.

Dr Renee Zahnow

The University of Queensland

Renee Zahnow graduated from the University of Queensland with a PhD in Criminology in December 2015. Since this time she has completed two 12 month postdoctoral positions while also maintaining a teaching load. Renee has published 25 peer-reviewed journal articles (with a further six currently under review); two peer reviewed published conference papers; two book chapters and several Government reports. One of these, The Queensland Alcohol-related violence and Night Time Economy Monitoring project: Interim Report, resulted in an immediate change in state policy to align with the report recommendations. In 2017, Renee completed a secondment at the Queensland Crime and Corruption Commission where she provided expert advice on the development of a community-based drug intervention to address methamphetamine use in Australia. Renee has presented her work at numerous international conferences in the USA, UK and Europe including an invited key speaker address at the 2016 Steroid Conference in Liverpool, UK.

Dr Tamsyn Van Rheenen

The University of Melbourne

Dr Tamsyn Van Rheenen is an exceptional early career researcher whose work has advanced understanding of the brain and behaviour in severe mental illness. At an FTE of just 3 years post PhD, she has already authored 38 papers and 2 book chapters in leading international journals, and accrued competitive grant funding totalling >\$700,000. The scientific and public impact of her work is apparent through considerable citations (relative to opportunity) and (inter)national media coverage, with her leadership potential and international visibility reflected in expert taskforce and national society appointments, editorial and speaking invitations, and multiple international collaborations. Her scientific excellence has been recognized with several prestigious awards, including a Discovery Award High Commendation from Research Australia, and an Association for Psychological Science Rising Star Award. Tamsyn's outstanding track record combined with community engagement that transcends many of her early-career peers, undoubtedly position her as an emerging leader and powerful role model for young researchers.

Past Award Recipients

2017: Mark Humphery-Jenner, Daniel King, Amy King, Elise Sargeant
 2016: Muireann Irish
 2015: Philip Batterham
 2014: Emma Kowal
 2013: Anina Rich
 2012: Paul Dux
 2011: Linda Graham
 2010: Christy Newman
 2009: Mark A Bellgrove
 2008: Murat Yucel
 2007: Jason Sharman
 2006: Andrew Leigh, Jennifer Hudson
 2005: Thomas Suddendorf
 2004: Alex Bellamy
 2003: Lisa Maher
 2002: Jason B Mattingley
 2001: Robert Hill, Kaarin Anstey
 2000: Andrea Whittaker
 1999: Richard Bryant
 1998: Chandran Kukathas
 1997: Jeff Borland
 1996: Tony Aspromourgos
 1995: Kay J Anderson
 1994: Debbie Terry
 1993: John Quiggin
 1992: Robert Cribb
 1991: Peter Higgs
 1990: Vicki Lee
 1989: Gregory Whitwell
 1988: Wojciech Sadurski
 1987: Richard Fox

FELLOWS Awards

2019 AUSTRALIA DAY HONOURS

Companion AC in the General Division:

The late Emeritus Professor Patrick TROY AO, for eminent service to urban and regional planning, to environmental sustainability and social justice policy, and as a mentor and role model.

Officer (AO) in the General Division:

Professor Helen CHRISTENSEN, for distinguished service to medical research through the development of on-line mental health treatment programs.

Professor Mark DODGSON, for distinguished service to education in the field of business innovation strategy, as a researcher, advisor and author.

Professor Melanie WAKEFIELD, for distinguished service to medical research in the fields of population health and cancer prevention, and as a mentor.

Member (AM) in the General Division:

Professor Frank BONGIORNO, for significant service to tertiary education in the field of history.

Professor Lynette RUSSELL, for significant service to higher education, particularly Indigenous history, and to professional organisations.

2019 QUEEN'S BIRTHDAY HONOURS

Officer (AO) in the General Division:

Emeritus Professor Murray WELLS for distinguished service to higher education, particularly to accountancy, and to business administration.

Emeritus Professor Susan Caroline KIPPAX for distinguished service to higher education, and to community health, particularly through research into HIV prevention and treatment.

Member (AM) in the General Division:

Professor Margaret Anne ABERNETHY for significant service to higher education, accounting research, and to student access and equity.

Professor Victor James CALLAN for or significant service to higher education in the field of management.

Professor Gilah Chaja LEDER for significant service to higher education, and to the Jewish community of Victoria.

Emeritus Professor John Hurlstone POLLARD for significant service to community music events, and to education.

Dr Peter John READ for significant service to Indigenous history.

Jubilee Fellows

In 2018, the Academy extended the honour of Jubilee Fellowship to four Fellows who were elected to the Academy in 1978. Over 40 years, these Fellows have made significant contributions not only to the Academy but also to the social sciences in Australia and abroad. Reflections from these distinguished scholars can be found on the Academy's website.

Professor Robert O'Neill AO

BE (Melbourne), MA, DPhil (Oxford), FASSA, FAIIA
PANEL C: History

Emeritus Professor Peter Sheehan AO

BA, PhD (Sydney), Honorary Fellow, FASSA
PANEL D: Psychology

Emeritus Professor Richard Selleck

BA, Bed, PhD (Melbourne), FASSA
PANEL D: Education

Mr Bob Wallace

BCom (Hons) (Melbourne), BPhil (Oxford)
PANEL B: Economics

 Professors Glenn Withers and Peter Sheehan.

 Professors Glenn Withers and Robert O'Neill.

FELLOWSHIP

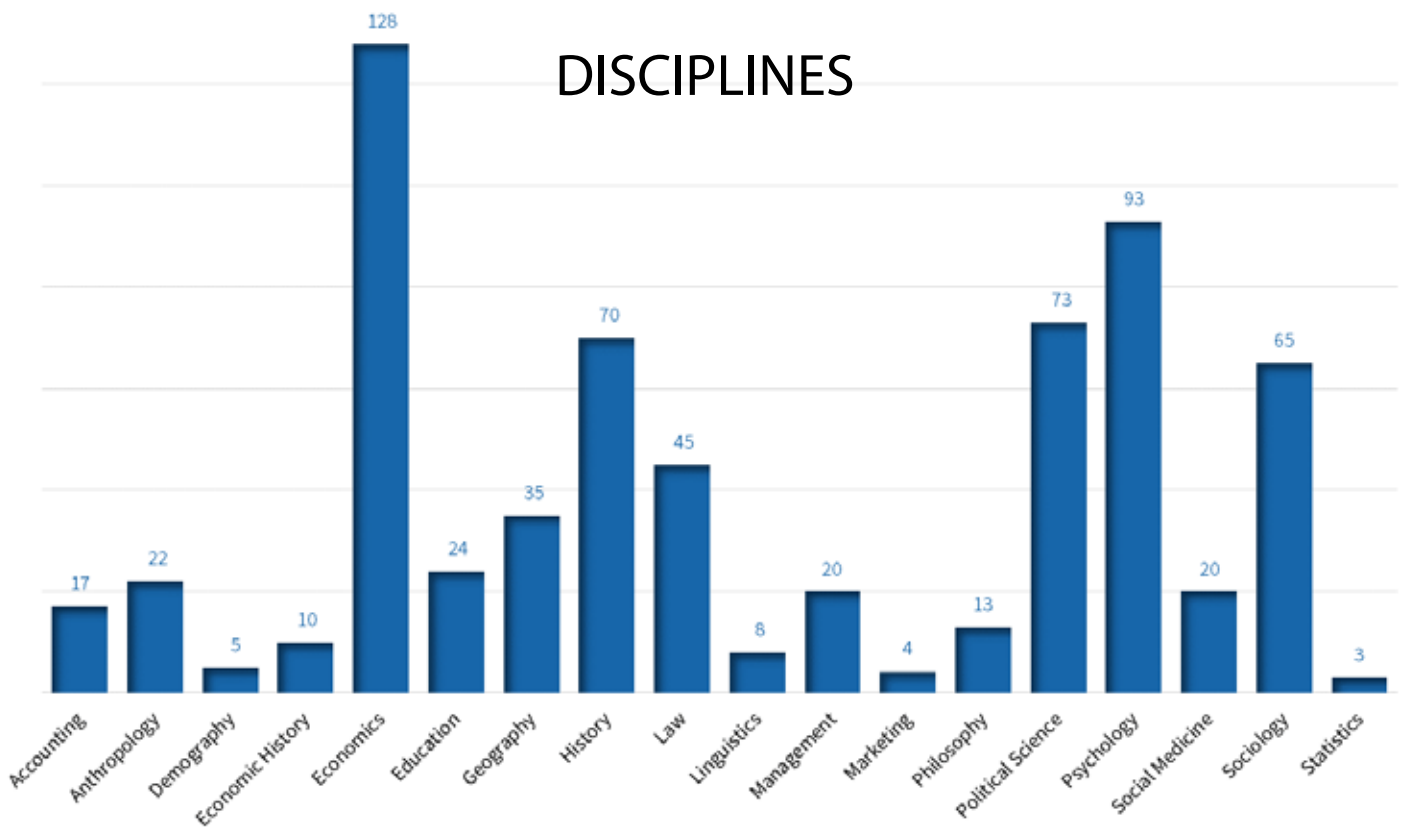

Demographics

PANELS

DISCIPLINES

New Fellows

Professor David Alais

Professor of Experimental Psychology, School of Psychology, University of Sydney

Expertise: Visual perception, multisensory interactions, perceptual ambiguity

Professor Ian Anderson AO

Pro Vice-Chancellor (Engagement) and Foundation Chair of Indigenous Higher Education, University of Melbourne and Deputy Secretary of Indigenous Affairs, Department of the Prime Minister and Cabinet

Expertise: Indigenous affairs (public policy, health, education)

Professor Martha Augoustinos

Professor, School of Psychology, University of Adelaide

Expertise: Social psychology, discursive psychology, racism, prejudice

Professor Christine Beasley

Professor, Department of Politics and International Studies, School of Social Sciences, University of Adelaide

Expertise: Social/political theory, gender and sexuality, men and masculinity, cultural studies, care theory

Emeritus Professor Martin Bell

Emeritus Professor, School of Earth and Environmental Sciences, University of Queensland

Expertise: Demography, internal migration, population mobility

Professor Denis Burnham

Chair in Auditory Research, The MARCS Institute for Brain, Behaviour and Development, Western Sydney University

Expertise: Speech perception, language development, infant-directed speech, lexical tone, auditory-visual speech

Professor David Burr

Professor of Psychology, University of Sydney and University of Florence

Expertise: Vision, perception, cognitive neuroscience, numerical cognition, psychophysics

Professor Annemaree Carroll

Associate Dean (Research), Faculty of Humanities and Social Sciences, University of Queensland

Expertise: Educational psychology, emotion regulation, social emotional learning, science of learning, intervention research

Professor Joshua Cinner

Professor of Social Science, ARC Centre of Excellence for Coral Reef Studies, James Cook University

Expertise: Fisheries, conservation, livelihoods, socioeconomic, vulnerability

Professor George Crowder

Professor, School of Social and Policy Studies, Flinders University

Expertise: Political theory, political philosophy, Isaiah Berlin, liberalism, value pluralism

Professor Denise Doiron

Professor of Economics, School of Economics, UNSW Sydney

Expertise: Health economics, labour, applied econometrics, program evaluation, social policy

Professor Robyn Dowling

Professor of Urbanism and Associate Dean, Research School of Architecture Design and Planning, University of Sydney

Expertise: Urban geography, urban governance, transport, energy, climate change

Professor Nick Enfield

Professor of Linguistics and Director of the Sydney Social Sciences and Humanities Advanced Research Centre, University of Sydney

Expertise: Linguistics, linguistic anthropology, social interaction, social agency, mainland Southeast Asia (especially Laos)

Professor Renée Fry-McKibbin

Professor of Economics, Centre for Applied Macroeconomic Analysis, Crawford School of Public Policy, and Associate Dean Research, ANU College of Asia and the Pacific, the Australian National University

Expertise: Macroeconometrics, financial market econometrics, contagion, commodities

Professor Margaret Gardner AO

President and Vice-Chancellor, Monash University

Expertise: Leadership, management strategy, gender equity, industrial relations, tertiary education

Professor Jacob Goeree

Scientia Professor and Director, AGORA Centre for Market Design, School of Economics, UNSW Business School, University of New South Wales

Expertise: Market design, game theory, experimental economics

Professor Ferdinand Gul

Alfred Deakin Professor of Accounting and Finance, Faculty of Business and Law, Deakin University

Expertise: Financial accounting, auditing, corporate governance and corporate political activities

Professor John Handmer

Professor and Director, RMIT University Centre for Risk and Community Safety, School of Mathematical & Geospatial Sciences, RMIT University

Expertise: Risk, disasters, natural hazards, climate change adaptation

Professor Matthew Hornsey

Social Psychology, Faculty of Health and Behavioural Sciences, University of Queensland

Expertise: Persuasion, trust, intergroup relations, rejection of science, social psychology

Professor Jennifer Hudson

Professor of Psychology and Director, Centre for Emotional Health, Macquarie University

Expertise: Clinical child psychology, child and youth mental health, child and adolescent anxiety disorders

Professor Simon Jackman

Professor, Department of Government and International Relations and CEO of the United States Studies Centre, University of Sydney

Expertise: Elections, electoral systems, public opinion

Professor Stewart Jones

Professor of Accounting and Head of Discipline (Accounting), University of Sydney

Expertise: Corporate financial reporting, credit risk and corporate bankruptcy prediction, accounting regulation, corporate social responsibility reporting

Professor Anne Kavanagh

Professor of Women's Health and Director, Gender and Women's Health, Centre for Health Equity, Melbourne School of Population and Global Health, University of Melbourne

Expertise: Epidemiology, disability, health inequalities, health policy

Professor Andrew May

Professor of History, School of Historical and Philosophical Studies, University of Melbourne

Expertise: Urban history, cultural heritage, Melbourne, missionaries, North-East India

Professor Kerrie Mengersen

Distinguished Professor, Australian Laureate Fellow and Professor of Statistics, Science and Engineering Faculty, School of Mathematical Sciences, Statistical Science, Queensland University of Technology

Expertise: Applied statistics, biostatistics, environmetrics, biometrics

Professor Cheri Ostroff

Research Professor, Centre for Workplace Excellence, School of Management, University of South Australia

Expertise: Organisational behaviour, organisational culture and climate, human resource management systems, organisational effectiveness

Professor Sharon Pickering

Professor of Criminology and Dean of Arts, Monash University

Expertise: Criminalisation, migration, gender, trafficking, borders

Professor Rosemary Rayfuse

Scientia Professor of Law, Faculty of Law, UNSW Sydney

Expertise: Public International Law, Law of the Sea, International Environmental Law, Protection of the Marine Environment

Professor Kim Rubenstein

Professor, ANU Law School and ANU Public Policy Fellow, the Australian National University

Expertise: Citizenship, Nationality, Oral history, archives and law, Gender and the Constitution

Professor Elizabeth Savage

Professor, Economics Discipline Group, UTS Business School, University of Technology Sydney

Expertise: Applied microeconomics, health economics, public economics

Professor Derrick Silove AM

Foundation/Scientia Professor in Psychiatry, School of Psychiatry, UNSW Sydney

Expertise: Refugee and postconflict mental health, Global Mental Health, Psychiatric Traumatology, Mental health of deprived and marginalized populations

Professor Julie Stout

Monash Institute of Cognitive and Clinical Neurosciences, School of Psychological Sciences, Faculty of Medicine, Nursing and Health Sciences, Monash University

Expertise: Dementia, movement disorders, Huntington's disease, cognitive assessment in clinical trials, cognitive neuroscience

Professor Maggie Walter

Professor of Sociology and Pro Vice-Chancellor (Aboriginal Research and Leadership), University of Tasmania

Expertise: Sociology of race, methods and methodologies, inequality, Indigenous lifeworlds, Indigenous data

Professor Peter Whiteford

Professor, Crawford School of Public Policy, ANU College of Asia and the Pacific, the Australian National University

Expertise: Social Security, welfare, Income inequality, redistribution, poverty

Professor Gillian Whitehouse

Professor of Political Science, School of Political Science and International Studies, Faculty of Humanities and Social Sciences, University of Queensland

Expertise: Gender pay gap, gender egalitarian parental leave, precarious employment, gender regimes, employment rights

Professor Yi-chong Xu

Professor, Centre for Governance and Public Policy, School of Government and International Relations, Griffith University

Expertise: Nuclear energy, electricity, political economy, international organisations

DR JOHN MARK BEATON (1944-2018). BA, MA (UCLA), PhD (ANU), FASSA

Dr John Mark Beaton passed away in the early hours of 6 November 2018 at his home in Canberra. At the time of his death, just 10 days past his 74th birthday, John was nearing the end of his 17th year as the Executive Director of the Academy of the Social Sciences in Australia.

John led a life and made a contribution that bridged hemispheres. He was born in Colorado, and raised and educated in California, where he began his anthropological research and academic career. He also spent many years traversing Australia undertaking excavations and field work, holding academic posts, surfing, and eventually making his home here.

He earned his BA and MA degrees in Anthropology from UCLA. His 1973 MA thesis sought to use the prey choice model in an analysis of changes in the taxonomic composition of coastal California shell middens. This research resulted in the finding that human predation pressure could have predictable, quantitatively structured, archaeologically testable effects on resource availability and consumer choice. Shortly thereafter, he applied for and was awarded a PhD scholarship in Jack Golson's ANU Prehistory department. His 1977 dissertation, entitled *Dangerous Harvest: Investigations in late pre-historic occupation of upland south-east central Queensland*, documented the Late Holocene role of cycads in central Queensland economies and linked their exploitation to the development of ceremonial practices both there and more broadly across the

tropical north.

From 1978-83, he held the position of Research Fellow at, what was at the time, the Australian Institute of Aboriginal Studies, before returning briefly to ANU until 1985. John spent much of the late 1980's and 1990's as an Anthropology Professor at the University of California (Davis) before once again returning to Australia in 1997 to Direct the University of California Australia Study Centre in Melbourne. He was appointed Executive Director of the Academy of the Social Sciences in 2001 and held this position until his death. He was much loved by the staff of the Academy and is greatly missed. John was posthumously awarded Honorary Fellowship of the Academy in recognition of his contribution to the field of Anthropology and considerable impact on furthering advocacy for the social sciences in his time as Executive Director.

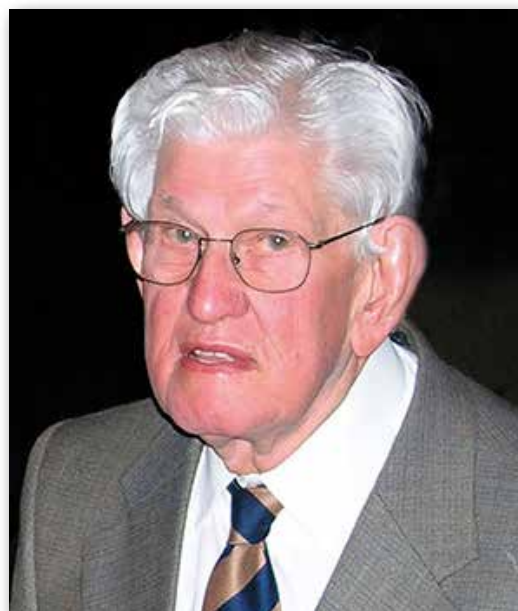

It is also worth noting that John was a respectable cricketer (especially for an American) and played various formal roles in the ANU Cricket Club, including 16 seasons as Club President, services ultimately recognised with the award of a lifetime honorary membership. He loved baseball and cricket in equal measure, played flamenco guitar, was an excellent woodworker, and enjoyed dogs, guns, Irish whiskey and good company. He used to watch Cops on late-night TV to see if he recognised anyone, and would always put nature documentaries on for the dogs while he cooked dinner.

He is survived by his former wives, Esther Beaton (nee Horvath) and Susan Beaton (nee Britton), and his two children, Laura and Daniel. For those who encountered John when speaking of his children, he could be nothing by gleeful and proud to tell you about them. He would often refer to them as his "greatest achievement", and on this, there was never any dispute. In his life John also brought countless creatures into his household, the ever-present hounds but also notably twin yellow-crested cockatoos named Sydney and Adelaide (who now reside at wildlife park in California) and the occasional turtle. In addition to the human members of his family, John is survived by three "house-wolves" – Walter, Rusty, and Odie (the defacto Academy mascot). They are being well-cared for in his absence.

John had a gift for language, always using exactly the right word for his intention, referencing EB White and New Yorker cartoons often, and was fond of saying "that's no way to run an airline" or "that dog won't hunt" if something wasn't up to scratch.

He dispensed infinite “benefit of the doubt” and encouraged others to extend their abilities and confidence. Those who had the pleasure of knowing John are the better for it, and in his children and those students, researchers, cricketers and staff that he mentored - his legacy will be carried on.

Authored by: Liz West (ASSA Deputy Director) with assistance from Laura and Daniel Beaton and reference to J. F. O’Connell (2019) *John Beaton (1944–2018): an archaeological retrospective*, *Australian Archaeology*, 85:1, 110-113.

PROFESSOR ROSS DAY (1927-2018)

BSc (Western Australia), PhD (Bristol), DUniv (La Trobe), HonDSc (La Trobe), FASSA, FAPsS, FAA

Ross Day was born in the small town of Albany (Western Australia) in 1927, and passed away in Sale (Victoria) in 2018. He completed his secondary education at Albany High School in 1945 and then enrolled in a BSc (Hons) at the University of Western Australia in 1946. There he was greatly influenced, in his second year as an undergraduate, by the experimental psychologist Tim Marshall, who was working on dark adaptation in vision, and who became Ross’s Honours supervisor (this resulted in Ross’s lifelong interest in visual perception and visual illusions.) Ross graduated with First Class Honours (finishing top of his Honours class) in 1949. During his third year, he was offered a graduate assistant position in psychology, which he held throughout his honours year.

While he was an undergraduate, he met Grecian Snook, also an undergraduate there; she was also a member of the Australian Women’s Army, which paid a stipend of a little over three pounds a week, without which she could not have afforded to attend university. She became a historian, and also became Ross’s wife. After more than sixty years of a close and happy marriage, Grecian Day passed away in October 2017.

After Ross had completed his honours year, he wanted to move to the UK, and, with Tim Marshall’s assistance, obtained two job offers there, one in Manchester and one in Bristol; he chose the latter and moved to the University of Bristol, first as an

assistant lecturer (1950-51) and then research fellow (1951-55). Whilst at the University of Bristol, he completed a PhD on visual tracking, funded by Britain's Air Ministry (1952-54). During this period in England he married Grecian, and the first of their three children was born there.

He returned to Australia as lecturer, then senior lecturer, then reader (1955-1964) in the Psychology Department at the University of Sydney. In 1965, Monash University established a new Department of Psychology and offered him the Foundation Chair in Psychology, which he accepted. He held this position until his retirement in 1992 and, as well as establishing a strong experimental psychology department, he served as Associate Dean of the Faculty of Science (1981-83). After retirement he became adjunct professor in psychology at La Trobe University, where he established a lab and continued to work on perceptual illusions.

The department he established at Monash was Australia's first department of experimental psychology, and many of those who worked there at or after its inception have commented on what an exciting and intellectually vigorous place it was to work – thanks to Ross. This was not only because of the intellectual leadership he provided, and his clear and incisive lecturing style, but also because of his personality – his affability, his infectious enthusiasm, his penchant for black humour, and his literary interests (Waugh and Wodehouse were particular favourites of his). He and Grecian provided frequent opportunities for colleagues to wine, dine and converse at their house, making life in the Monash department socially as well as intellectually highly enjoyable.

Ross's intellectual style can be illustrated by the following example. The Falls of Foyers are a waterfall on the River Foyers, which feeds Loch Ness in Scotland. A Mr R. Addams, visiting the falls in 1834, noticed that if he looked at the downward-moving water of the falls for some time and then switched his gaze to the rocky face adjoining the falls, those rocks seem to be moving upwards, and published an account of his experience in the London and Edinburgh Philosophical Magazine and Journal of Science. This effect came to be known as the movement after-effect, and was much studied by Ross. He recounts that one afternoon when he was in the lab with his PhD student Ed Strelow observing the effect, they wondered what it would look like in the dark. They therefore switched the lights off so that all that could be seen was a little aperture with bars in it moving down. When they stopped

the motion, they were surprised to find that no after-effect was seen. This was at the end of a long and tiring day in the lab, so Ross was distrustful of the observation. He suggested that they should return fresh the next morning (which happened to be a Saturday). They confirmed then that the movement aftereffect was not observed if there was no patterned surround to the moving object, a result which disconfirmed what was then a common explanation of the effect. He and Strelow published this work in *Nature* in 1971. A few years later, in 1977 while visiting Nicholas Wade, a former PhD student in Dundee, he and Wade went on a celebratory expedition to Loch Ness, and a photograph exists of Ross standing beside the Falls (holding up a copy of a book *Visual Perception*).

When taking up his post at Monash, Ross had insisted that the Psychology Department be located within the Faculty of Science rather than, as was standard at the time, the Faculty of Arts. This practice was subsequently adopted in many other Australian universities, to the great benefit of Australian experimental psychology, which also benefited from his insistence, when he was a member of the Australian Research Grants Committee (now the Australian Research Council), that psychology be treated on a par with other sciences.

Ross was President of the Australian Psychological Society (APS) in 1966-1967, was a member of the APS Council for ten years, edited the *Australian Journal of Psychology* for four years, and was made an honorary Fellow of the APS in 1992.

His distinguished contributions to science were recognized by his election as Fellow of the Academy of the Social Sciences in Australia in 1967 and as Fellow of the Australian Academy of Science in 1990 – the first psychologist to be elected to that Academy.

FASSA FAA

PROFESSOR MARDI DUNGEY (1966-2019) *BEC, BEc Hons (UTas), PhD (ANU), FASSA*

On January 12, 2019, Professor Mardi Dungey, one of Australia's leading macroeconomists, passed away at the age of just 52. Mardi made major contributions to society through her research, her supervision of students, her mentoring of junior academics, her many professional contributions to the economics profession and academia more generally. She was also a wonderful co-author to 75 people from around the world. Mardi was Professor of Economics and Finance in the School of Economics and Finance at the University of Tasmania; Senior Research Fellow, Centre for Financial Analysis & Policy at the Judge Business School in the University of Cambridge and Adjunct Professor in the Centre for Applied Macroeconomic Analysis, Crawford School of Public Policy at the Australian National University.

She held editorial positions with the *Journal of Financial Stability*, *Journal of Banking and Finance*, *Multinational Finance Journal*, *Journal of Applied Econometrics* and the *Journal of Asian Economics*. In 2013, Mardi was elected a Fellow of the Academy of Social Sciences in Australia in recognition of her contributions to academic scholarship in Australia. Mardi's academic career began with a Bachelor of Economics degree with Honours from the University of Tasmania in 1989, during which time, she held a highly prestigious cadetship at the Reserve Bank of Australia. Upon completion, Mardi joined the International Department at the Reserve Bank where she worked for four and a half years. However, research was Mardi's passion. In 1994 Mardi moved to the ANU Research School of Social Sciences to

undertake a PhD in Economics with ASSA Fellow Professor Adrian Pagan. She completed her PhD in 1998. Her thesis on "International Influences on the Australian Economy" was an important contribution to empirical research on the Australian economy. A paper from her thesis co-authored with Adrian Pagan won the award for the best paper published in the *Economic Record* in 2000. This paper continues to be highly cited almost 20 years later and serves as a benchmark for modelling small open economies such as Australia.

In 1998 Mardi left ANU and accepted a Lecturer position at La Trobe University. Her time at La Trobe coincided with the aftermath of the Asian Financial Crisis. This event sparked her interest in modelling financial market crises and contagion and the linkages between finance and the macroeconomy. She was one of the first researchers to take such linkages seriously. Mardi returned to ANU in 2000 as a Fellow in the Economics Department in the Research School of Pacific and Asian Studies (RSPAS). Mardi was a dynamo who significantly contributed to the RSPAS economics department through her supervision of PhD students and administrative leadership in all student matters. She was a key person at important strategic meetings at the University. Mardi had an unusual balance of common sense, outstanding academic ability and entrepreneurial flair. She was innovative in her role as the PhD student coordinator and contributed enormously to her colleagues' research by offering generous advice on econometric issues. She was instrumental in establishing the Centre for Applied Macroeconomic Analysis (CAMA) in 2003 and was the inaugural Deputy Director of CAMA. She remained active in CAMA as co-Director of the Program in Finance and the Macroeconomy until her death.

In 2005 Professor John Eatwell recruited Mardi to Cambridge University after seeing her present her work on bond market contagion at a conference run by the Bank for International Settlements in Basel. She became the Deputy Director of the Cambridge Endowment for Research in Finance (CERF). In 2008 Mardi returned to Australia as Professor of Economics and Finance at the University of Tasmania where she built up a powerhouse of upcoming talent in the faculty and the student body. The networks Mardi built and her willingness to create public goods for all to benefit from is another of Mardi's key contributions. Internationally renowned economists who became Mardi's friends, coauthors and students would come to Australia to visit Mardi in Hobart. She shared the benefits throughout the Australian economics community through their attendance

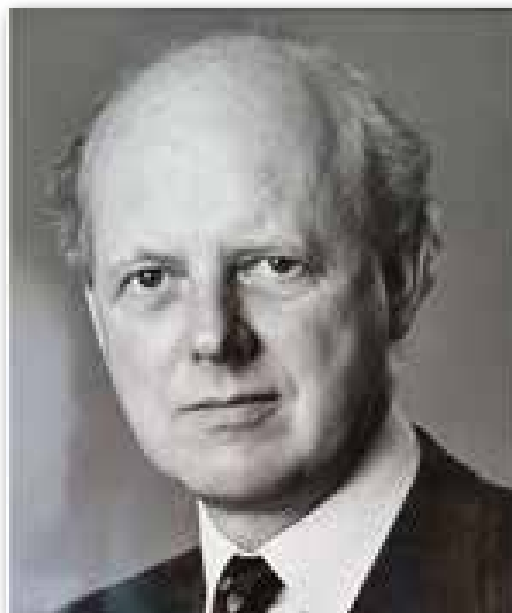

at conferences, workshops and joint visiting opportunities.

Mardi was a global researcher. During her career, she held visiting positions at the International Monetary Fund, University of Cambridge, Princeton University, the Federal Reserve Bank of Atlanta, the Asian Development Bank and the Australian and New Zealand Treasuries. She was also heavily engaged with advising the Australian Treasury on econometrics and mentored several generations of Treasury officials. She worked on the Treasury's new macroeconomic model (EMMA), which was presented at the last workshop that she organised, but that she was too ill to attend.

Mardi always made time to inspire the upcoming generations. Under her initiative, Mardi visited primary schools in Tasmania to teach children basic economics. She would inspire the students by taking a huge box of foreign currency to school, to let them work out exchange rates. She would run a stock market game over several weeks, where the students chose and followed companies on the Australian Securities Exchange.

In addition to her intellectual contributions, her energy and enthusiasm for knowledge, Mardi will best be known as a generous colleague. She contributed mightily to improving the opportunities for junior academics and countless students, both men and women in the economics profession. Australia has lost a valuable contributor to macroeconomics, policymaking and society.

Authored by: Professor Renee Fry-McKibbin FASSA and Professor Warwick McKibbin FASSA.

EMERITUS PROFESSOR

JOHN R V PRESCOTT (1931-2018)

B.Sc., M.A., Dip.Ed. (Durham), Ph.D. (Lon.), M.A. (Melb.), FASSA

J.R.V. Prescott, familiarly known as Victor, was born in Newcastle-upon-Tyne 1931 and educated in England. He completed his first degree, an Honours B.Sc. at King's College, Durham University, in 1952, followed by two years' National Service in the Royal Artillery before returning to King's College (which in 1963 became the University of Newcastle upon Tyne) to complete a Diploma in Education, after which he taught at Washington Grammar School in County Durham, where he was known to the students as 'The Duke', after the Duke of Edinburgh.

In September 1953 he married Dorothy Francis Allen, his college sweetheart. In September 1956 he was appointed as a lecturer in the Department of Geography, University of Ibadan, Nigeria, where he remained until mid-1961, the year after Nigerian independence. Whilst in Nigeria he gained an M.A. from Durham and a Ph.D. from the University of London. His M.A. thesis was on the boundary of Ulster, Northern Ireland, and his doctorate on Nigeria's political boundaries. Most of his African papers were produced in the years 1956 to 1961 and are either of Nigerian or Zimbabwean (Rhodesian) interest.

In August 1961 the Prescott family migrated to Australia where Victor was appointed a lecturer in geography at the University of Melbourne. The remainder of his academic career was at Melbourne where he was awarded a personal chair in geography

in 1986. In 1983 he spent a year as academic-in-residence at the Department of Foreign Affairs in Canberra, working for the Foreign Minister, Bill Hayden. The work undertaken was an analysis of the geographical terms in the United Nations Convention on the Law of the Sea. He was also asked by Foreign Affairs in June that year to go to the Solomon Islands to consult with local leaders about maritime boundaries. In 1995, Victor became President of the Academic Board and Pro-Vice Chancellor at the University of Melbourne, a position which he held until his retirement in December 1996, at which point he became Professor Emeritus. Victor was known for his fairness in supporting students who had suffered problems at the departmental level. He smoothed many paths through his wise judgement. His reserved mien belied his very strong humorous leanings and he was a raconteur extraordinaire, with a ready store of jokes and limericks appropriate to the situation.

Victor regarded himself as a political geographer, the seed being planted early in his years as a student at King's College where he was fortunate enough to have Professor John House, later of Oxford University, as a lecturer. His early work focussed on electoral geography but swiftly changed to boundary studies. His first book, *The Geography of Frontiers and Boundaries*, in a series edited by Professor Gordon East, appeared in 1965. This title and two others were reissued by Routledge in 2016 after a lapse of 50 years.

Two sources of inspiration for him were the creation of the International Boundaries Research Unit (IBRU) at Durham University in 1989, and meeting Jonathan Charney in 1992. Charney successfully persuaded the American Society of International Law to fund a systematic analysis of international maritime boundaries. The death of Charney in 2002, after the completion of four volumes, was a blow to all contributors but fortunately by this stage the pattern of publishing had been well established and the work continues.

Victor considered himself fortunate in his co-authors, Clive Schofield and Gillian Triggs, who respectively co-authored *The Maritime Political Boundaries of the World* (2006) and *International Frontiers and Boundaries* (2008). He was also fortunate in having a cartographer par excellence, Chandra Jayasuriya who drew the many maps illustrating these works. After his retirement he consulted to foreign governments on maritime boundary cases and appeared before the International Court of Justice and the Supreme Court of the United States. In

Australia, Victor appeared in cases involving native title claims to seas and the seabed in hearings before a Land Rights Commissioner in the Northern Territory.

He had excellent relations with the Foreign Offices in both Malaysia and Indonesia, giving workshops and lectures to their staff. He enjoyed this work enormously, encountering several bright and enquiring students which gave him great pleasure. He also greatly enjoyed his time with the Chinese in Tianjin at the Asia-Pacific Development Research Centre in 1999.

Apart from his academic work Victor was a psephologist, an analyst of elections, who called both national and state elections for the Australian Broadcasting Commission (ABC) election television coverage from the mid-sixties until the late eighties. He started this work using only a slide rule in the years before computers became the norm, his forecasts being 100% correct.

His other work for the ABC consisted of writing political commentaries, News Commentaries and Notes on the News which were broadcast weekly for twenty years. Those were the days when the radio was listened to more than TV and his distinctive voice was recognised in many remote places, including in Namibia where a student of his challenged him in an off-road eatery.

Victor is survived by his wife, Dorothy, daughter Margaret, and son, Philip. He had 2 grandchildren Matthew and Elise, and 4 great grandchildren, Tyson, Beau, Maddison and Leni.

Authored by: Mrs Dorothy Prescott. As published in the Journal of the Australian and New Zealand Map Society Inc. The Globe, Number 85, 2019.

EMERITUS PROFESSOR

ERIC RICHARDS (1940-2018)

BA, PhD (Nottingham), FRHistS, FASSA, FAHA

On 21 September 2018 Emeritus Professor Eric Richards, who had been a Professor of History at Flinders University from 1975, died suddenly while in London, aged 78. This was as sad as it was shocking for his family, colleagues and friends. Eric will be remembered as one of the great Australian historians of the last 50 years and one of the great gentlemen of our profession.

Born into a rural family in North Wales on 3 August 1940, Eric's family had experienced the suffering of the Great Depression and the Second World War, and were forced to leave the land, moving first to Wrexham, the largest town in North Wales, and finally Shropshire, just over the border in the West Midlands of England. After studying his BA (1962) and while undertaking his PhD (1967) at the University of Nottingham, Eric became a Lecturer in Economics at the University of Adelaide from 1964-7 (having arrived as a ten-pound 'Pom' in 1963!), then a Lecturer in History (as par of the first intake of staff) at the University of Stirling from 1967-71, before returning to Adelaide as Lecturer in Economic History at Flinders University in 1971. He quickly climbed the ranks, going from Lecturer, to Senior Lecturer, to Reader, and finally Professor and Chair in History in 1975. He was for many years the Head of the History Department and a prominent member of faculty, sitting on all sorts of committees, while he also had numerous visiting professorships, at Warwick, Glasgow, Florence, Cardiff, Cleveland Ohio, Canberra and London (at both Birkbeck and King's College). His reluctant retirement in 2012 meant, as he stated, that

he was now on 'permanent sabbatical' as an Emeritus Professor.

Eric will be specifically remembered for his influential works on history of British migration and the Highland Clearances. In a career which started with his first publication in 1954 and ended with his last publication in 2019, Eric published 11 authored books (12 if we count), 22 book chapters, 22 journal articles in peer reviewed journals. These are phenomenal statistics, especially when one considers the fact that for most of his career there did not exist an internet, a digital camera, or a computer! Eric will be especially remembered for his ground-breaking, and beautifully written books: *The Leviathan of Wealth: The Sutherland Fortune in the Industrial Revolution* (1973); *A History of the Highland Clearances: Vol. 1. Agrarian Transformation and the Evictions, 1745-1886* (1982), winner of the Scottish Arts Council book award; *A History of the Highland Clearances: Vol. 2. Emigration, Protest, Reasons* (1985); (with Monica Clough) *Cromartie: Highland Life 1650-1914* (1989); *Patrick Sellar and the Highland Clearances: Eviction, Homicide and the Price of Progress* (1999), recipient of the Scottish History Book of the Year; *The Highland Clearances: People, Landlords and Rural Turmoil* (2000 & numerous editions); *Britannia's Children: Emigration from England, Scotland, Wales and Ireland since 1600* (2004); *Debating the Highland Clearances* (2007); *Destination Australia: Migration to Australia since 1901* (2008), winner of the NSW Premier's Literary Prize; and *The Highland Clearances* (2013). His most recent book, *The Genesis of International Mass Migration: The British Case, 1750-1900*, published in July 2018, adds to his corpus of highly influential books in fields that he was instrumental in making front and centre of Australian and British historical scholarship. Special mention must also be made of his leadership in the publication of the influential six volumes in the *Visible Immigrants* series. He published several landmark articles, particularly those in *Economic History Review* (1972, 1973 & 1974), *History* (1974), *Past and Present* (supplement 6, 1982, 60+ pages), *Journal of British Studies* (1993), *Australian Journal of Politics and History* (1995), (with A. Tindley) *Agricultural History Review* (2012), and most recently in *History. The Journal of the Historical Association* (2018). Then there are his numerous book chapters, including ones still forthcoming.

There were several important tributes to Eric during his life, such as those by Professor John MacKenzie *Imperial Expectations and Realities: El Dorados, Utopias and Dystopias* and another by Professor Philip Payton in *Emigrants and Historians: Essays in Honour of Eric Richards*. There was a Festschrift

and the *Eric Richards Symposium in British and Australasian History*, held first in Adelaide in 2017 and next in Armidale, NSW, in 2019. Eric was rightly proud of the events honouring him and he was also proud of his selection as Carnegie Trust Visiting Professor in 2014 at Scotland's newest university, the University of the Highlands and Islands.

Eric was on a typical working holiday when he passed away. He had given a keynote at the University of Picardie, Jules Verne, at Amiens, at the conference 'Colonial and Wartime Migration, 1815-1918'. From all reports he was in top form and he was his usual engaging self with other delegates. After a short holiday in the south of France, he went to London, no doubt to visit an archive or two, and later his old town of Shropshire.

Eric was a great role model for many. Whenever the opportunity arose at a conference or simply when introduced to another historian, young or old, Eric was the great encourager, the one who always showed an interest in your work, and the one who would ask that all important question. Eric's contribution to the History discipline was rewarded with numerous awards, including the Australian Centenary Medal for services to the Arts and to Australian society in 2003, as well as numerous ARC grants, including the last one in 2017.

Eric was a towering figure in the history of migration and diaspora histories and the history of the Highland Clearances over the last 50 years. He will be remembered as a prolific researcher, an inspiring mentor and role model, an eloquent speaker, and as a genuinely sincere, sensitive and humble human being, with a passion for playing tennis, only matched by his love for his discipline and its progress. Although his dance on earth has come to an end, he lives on through his work and the biennial *Eric Richards Symposium in British and Australasian History*, which will be next hosted by the University of Canterbury, Christchurch. Eric is survived by his wife Ngaire Naffine, Professor of Law, University of Adelaide, daughters Lou and Sally and grandchildren Stephanie and Bodie. Rest in peace Eric, you shall be missed and remembered fondly.

FRHistS, Flinders University.

EMERITUS PROFESSOR

PATRICK TROY AC (1936-2018)

BE (UWA), DipTP (London), MEngSci (UNSW), D Arch(honoris causa) (Melbourne), D Univ (Griffith), FASSA, MICE, FRAPI

Patrick Troy was a passionate advocate for better Australian cities. This was the continuous thread through his activities as an engineer, town planner, urban studies academic, senior federal public servant, author and activist.

The pinnacle of his influence was during the Whitlam government period in the 1970s. Pat left his job at the Australian National University to become deputy secretary of the newly established Department of Urban and Regional Development, with Tom Uren as its minister. Pat recruited and led the team that created policies for urban improvement and more balanced regional development. The intention was to make the cities more efficient, equitable and sustainable.

Emphasis was put on developing new growth centres, including Bathurst-Orange and Albury-Wodonga. Land commissions were established, mandated to release more public land to make housing more affordable. Big parts of Glebe and Woolloomooloo were bought for upgraded public housing so that working class people could still live in the inner city. The western suburbs were connected to the main sewer system, becoming fully flushed for the first time.

There was much more in the pipeline, too. The flurry

of activity brought the federal government into urban policy areas previously neglected by the states. Nothing quite like it has been seen since. Pat Troy's guiding hand was on all of it.

Not all the plans came to fruition. Cities and regions aren't easily transformed. It takes 20 years or more, and requires cross-party collaboration that is rarely seen in Australian politics. When Malcolm Fraser's Coalition government replaced Whitlam's government in 1975, DURD was abolished and business as usual resumed.

Although deeply disappointed, Pat didn't give up after DURD's demise. He put his energies into making the ANU's Urban Research Unit into the premier place for urban policy studies in Australia. He wrote and edited numerous books and reports, organised research projects and conferences, was active in the media and advised governments and whoever would listen.

Pat Troy was born in Geraldton, WA and then grew up in Fremantle. His dad Paddy was a waterside worker and the best-known Communist unionist in Western Australia. Paddy spent three months in jail for a minor political infringement. The Fremantle house where the family lived was a meeting place for activists and refuge for people needing help. To hear Pat talk about it, there was seldom a dull moment. After qualifying as an engineer, Pat was sponsored by the Federation of British Industry to undertake further study and work in the UK. On arrival in London, his sponsors interrogated him closely because Australian security authorities had told them that he was a potential trouble-maker. True to form, ASIO had made a simple error, confusing Pat with his dad.

After returning Down Under, Pat worked for the NSW State Planning Authority and studied highway engineering at the University of NSW. He moved to Canberra to join the Urban Studies Unit at the ANU in 1966 and was already well-established there, with strong personal Labor Party links, when the opportunity to work with the Whitlam government arose.

Both before and after his stint with Whitlam and Uren, he and his colleagues made the urban research program at the ANU a seedbed for talent. Many of its young researchers later became senior professionals and professors in their chosen fields. Pat also mentored PhD students from all around Australia who attended his residential workshops. He initiated a series of annual conferences on Australian cities for

urban researchers and practitioners.

Pat's contributions were officially recognised by his election to the Academy of Social Sciences in Australia and his being made an officer in the Order of Australia.

However, the fad for managerial restructuring started to infect universities in the 1980s and put his Urban Research Program under threat. The academic bureaucrats, in their "wisdom", eventually closed it in the 1990s. Pat never forgave them for what he considered to be an act of sheer bastardry.

Still, he maintained his academic connection with the ANU, becoming an emeritus fellow in the Centre for Resource and Environmental Studies. He also had honorary positions at Western Sydney University and the University of NSW where he continued to foster excellence in research. His life was that of a prominent public intellectual. Together with Hugh Stretton, author of *Ideas for Australian Cities*, he was Australia's greatest champion for seeking social justice through planning for better cities.

It was not all hard work. His home in Canberra with Sandy was a place of renowned hospitality, with fine food and plentiful good wines to be shared. Pat was a renowned raconteur. Some thought him increasingly grumpy in his later years but then there was a lot to be grumpy about.

What had happened to cities since the DURD era was a source of much chagrin. He thought that the fashion for urban consolidation was creating cities that are too dense, inequitable and unsustainable. The scourge of "economic rationalism" in public policy and its over-reliance on markets to "solve" social problems was a yet more general source of dismay.

But Pat never gave up hope of making a difference, even after his diagnosis with cancer more than a decade ago. Until his quite sudden end, he was actively researching, writing and lobbying. He maintained his strong physical presence.

Pat leaves his partner Sandy, brothers and sisters, many children and grandchildren.

All who care about the quality of urban life have much to thank him for.

Financial Statements

Academy of the Social Sciences in Australia Inc

ABN 59 957 839 703

**FINANCIAL REPORT FOR THE PERIOD ENDING
30 JUNE 2019**

COMMITTEE'S REPORT

Your committee members submit the audited financial statements of the Academy of the Social Sciences in Australia Inc for the financial years ended 30 June 2019.

Committee Members

The names of the committee members throughout the year and as at the date of this report are:

Professor Jane Hall	Professor Sharyn Roach Anleu
Professor Wai-Fong Chua	Professor Harry Bloch (to Dec 2018)
Professor Richard Holden	Professor Kevin Fox (from Jan 2019)
Dr John Beaton (to Nov 2018)	Professor James Walter (to Dec 2018)
Ms Liz West (from Nov 2018)	Professor Kate Darian-Smith (from Jan 2019)
Professor Kevin McConkey	

Principal Activities

The principal activities of the Association during the financial year ended 30 June 2019 was the advancement of knowledge and research in the various social sciences.

Significant Changes

No significant changes in the nature of the principal activities occurred during the financial year ended 30 June 2019.

Operating Result

The surplus of the Association for the financial year ended 30 June 2019 was \$85,928 (2018: \$98,636 surplus).

Signed in accordance with the resolution of the Members of the Committee.

Dr Chris Hatherley
Executive Director

Dated this 27th day of August 2019

Prof Wai-Fong Chua
Treasurer

Dated this 27th day of August 2019

Strategic Initiatives Reserve

In reviewing the accounting treatment of the Strategic Initiative Fund, previously held as an Unearned Income liability, it was determined that this fund was not a liability. The correct accounting treatment was determined to be that it should form part of Equity and be available for use as and when the Academy, through the Executive Committee, determines.

for the year ended 30 June 2019

Note 1 Statement of Significant Accounting Policies

These financial statements covers the Academy of the Social Sciences in Australia Inc ('the Academy') as an individual entity. The Academy is an association incorporated in the Australian Capital Territory under the *Associations Incorporation Act (ACT) 1991 ('the Act')*.

Note 2 Basis of Preparation

These financial statements are general purpose financial statements that have been prepared in accordance with the requirements of the *Australian Charities and Not-for-Profits Commission Act 2012*, Australian Accounting Standards Reduced Disclosure Requirements, Australian Accounting Interpretations and the Act.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in a financial report containing relevant and reliable information about the transactions, events and conditions to which they apply. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with the International Financial Reporting Standards. Material accounting policies adopted in the preparation of these financial statements are presented below and have been consistently applied unless otherwise stated.

These financial statements have been prepared on an accruals basis and are based on historical costs modified, where applicable, by the measurement at Fair Value of selected non current assets, financial assets and financial liabilities.

a. Income Tax

No provision for Income Tax has been raised as the Academy is exempt from tax under Subdivision 50-B of the *Income Tax Assessment Act 1997*.

b. Property, Plant and Equipment

Property, plant and equipment are measured on the cost basis less depreciation and impairment losses.

The carrying amount of plant and equipment is reviewed annually by directors to ensure that it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the assets' employment and subsequent disposal. The expected net cash flows have been discounted to their present day values in determining the recoverable amounts.

The cost of fixed assets constructed within the association includes the cost of materials, direct labour, borrowing costs and an appropriate proportion of fixed and variable overheads.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the association and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Capitalisation Threshold

The Capitalisation Threshold for all assets is \$250.00 per unit. In addition, the asset is expected to have a useful life of at least 12 months. Assets with a unit acquisition value of less than the Capitalisation Threshold will be expensed at the time of acquisition.

Academy of the Social Sciences in Australia Inc
Notes to the Financial Statements
for the year ended 30 June 2019

Depreciation

The depreciable amount of all fixed assets, including buildings and capitalised lease assets, is depreciated on a straight-line basis over the asset's useful life commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

The depreciation rates used for each class of depreciable assets are:

Class of Fixed Asset	Rate
Furniture	16.66%
IT Assets	33.33%

The residual value and useful life of all assets is reviewed annually and, if appropriate, adjusted accordingly.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains or losses on disposal of an assets are determined by comparing the proceeds from sale with the carrying amount. The gain/loss is included in the Statement of Profit or Loss and Other Comprehensive Income.

c. Leases

Leases of assets where substantially all the risks and benefits incidental to ownership of the asset, but not the legal ownership, are transferred to the Academy are classified as Finance Leases.

Finance Leases are capitalised by recording the asset and a liability at the lower of the amount equal to the fair value of the leased assets or the present value of the sum of the minimum lease payments and taking into account any guaranteed residual values. Lease payments are allocated between the reduction in the residual lease liability and the interest expense for the period.

Any assets held under a finance lease are depreciated on a straight line basis over the estimated useful life of each assets.

Leases of assets where substantially all the risks and benefits incidental to ownership of the asset remain with the lessor are classified as Operating Leases. In this case, the lease payments are charged as an expense at the time the lease payments are made.

Lease incentives arising through an operating lease are recognised as a liability and are amortised on a straight line basis over the life of the lease.

d. Financial Instruments

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the Academy becomes a party to a contractual provision in regard to the instrument. For financial assets, this is equivalent to the date that the Academy commits itself to either purchase or sell the asset (ie trade date accounting is adopted).

Academy of the Social Sciences in Australia Inc
Notes to the Financial Statements
for the year ended 30 June 2019

Financial instruments are initially measured at Fair Value plus any related transaction costs except where the instrument is classified 'at fair value through profit or loss' in which case, transaction costs are expensed to profit or loss immediately.

Classification and subsequent measurement

Financial instruments are subsequently measured at either Fair Value, Amortised Cost using the effective interest rate method or At Cost. Fair Value represents the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties. Where available, quoted prices in an active market are used to determine Fair Value. In other circumstances, valuation techniques are adopted.

Amortised Cost is calculated as:

- (i) the amount at which the financial asset or financial liability is measured at initial recognition;
- (ii) less principal repayments;
- (iii) plus or minus the cumulative amortisation of the difference, if any, between the amount initially recognised and the maturity amount calculated using the effective interest rate method; and
- (iv) less any reduction in value due to assessed impairment

The *Effective Interest Method* is used to allocate interest income or interest expense over the relevant period and is equivalent to the rate that exactly discounts the estimated future cash payments or receipts (including fees, transaction costs and other premiums or discounts) through the expected life or, when this cannot be reliably predicted, the contractual term, of the financial instrument to the net carrying amount of the financial asset or financial liability. Revisions to the expected future net cash flows will necessitate an adjustment to the carrying value with consequential recognition of a revenue or expense.

The Academy does not designate any interest in subsidiaries, associates or joint venture entities as being subject to the requirements of accounting standards specifically applicable to financial instruments.

(i) Financial assets at Fair Value through profit or loss

Financial assets are classified at 'Fair Value through profit or loss' when they are held for trading for the purpose of short-term profit taking, where they are Derivatives not held for hedging purposes, or when they are designated as such to avoid an accounting mis-match or to enable performance evaluation where an association of financial assets is managed by key management personnel on a Fair Value basis in accordance with a documented risk management or investment strategy. Such assets are subsequently measured at Fair Value with changes in the carrying value being a revenue or an expense.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost.

Academy of the Social Sciences in Australia Inc
Notes to the Financial Statements
for the year ended 30 June 2019

Loans and receivables are included in current assets, except for those which are not expected to mature within 12 months after the end of the reporting period and which are classified as non-current assets.

(iii) *Held-to-maturity investments*

Held-to-maturity investments are non-derivative financial assets that have fixed maturities and fixed or determinable payments and it is the Academy's intention to hold these investments to maturity. They are subsequently measured at Amortised Cost using the effective interest rate method.

Held-to-maturity investments are classified as non-current assets except for those which are expected to mature within 12 months after the end of the reporting period and which are classified as current assets.

(iv) *Available-for-sale financial assets*

Available-for-sale financial assets are non derivative financial assets that are either not capable of being classified into other categories of financial assets due to their nature or they are designated as such by management. They comprise investments in the equity of other entities where there is neither a fixed maturity nor fixed nor determinable payments.

Available-for-sale financial assets are classified as non-current assets except for those which are expected to be disposed of within 12 months after the end of the reporting period and which are classified as current assets.

(v) *Financial liabilities*

Non-derivative financial liabilities (excluding financial guarantees) are subsequently measured at amortised cost.

(vi) *Fair value*

Fair Value is determined based on current bid prices for all quoted investments. Valuation techniques are applied to determine the Fair Value for all unlisted securities, including any recent "arms length" transactions, reference to similar instruments and option pricing models.

(vii) *Impairment*

At the end of each reporting period, the Academy assesses whether there is objective evidence that a financial instrument has been impaired. In the case of available-for-sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether impairment has arisen. Impairment losses are recognised as an expense.

(viii) *Derecognition*

Financial assets are derecognised where the contractual right to the receipt of cash flows expires or the asset is transferred to another party whereby the Academy no longer has any significant continuing involvement in the risks and benefits associated with the asset.

Academy of the Social Sciences in Australia Inc
Notes to the Financial Statements
for the year ended 30 June 2019

Financial liabilities are derecognised where the related obligations are either discharged, cancelled or expire. The difference between the carrying value of the the financial liability extinguished or transferred to another party and the Fair Value consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised as an expense.

e. Impairment of Assets

At the end of each reporting period, the Academy reviews the carrying value of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's Fair Value less costs to sell and the Value-in-Use, is compared to the asset's carrying value. Any excess of the asset's carrying value over it's recoverable amount treated as an expense.

f. Employee Benefits

Provision is made for the Academy's liability for employee benefits arising from services rendered by employees to the end of the reporting period. Employee benefits that are expected to be paid within 12 months from the end of the reporting period have been measured at the amounts that are expected to be paid when the liability is settled. Employee benefits that are expected to be paid more than 12 months from the end of the reporting period have been measured at the present value of the the estimated future cash outflows to be made for those benefits.

In determining the liability, consideration is given to known employee wage increases and the probability that the employee may not satisfy the vesting requirements. Those cash outflows are discounted using market yields on national government bonds with terms to maturity that match the expected timing of the cash outflow.

Annual Leave liabilities are treated as current in line with the Academy's leave policies that expect employees to take their annual leave within 12 months of accruing the leave entitlement.

Where the value of the Employee Entitlement cannot be reliably be determined, no recognition of the entitlement will be made.

g. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at-call, other short term highly liquid investments with maturity within 12 months of the end of the reporting period, including Term Deposits with a fixed maturity date within 12 months of the end of the reporting period, and any bank overdrafts. Bank overdrafts, where they exist, are shown within borrowings under the current liabilities in the Statement of Financial Position.

h. Accounts Receivable and Other Debtors

Accounts receivable and other debtors include annual membership fees receivable from members as well as amounts receivable from customers of the Academy for goods and/or services provided in the ordinary course of business. Receivables expected to be received within 12 months of the end of the reporting period are classified as current assets. All other receivables are classified as non current assets.

Academy of the Social Sciences in Australia Inc
Notes to the Financial Statements
for the year ended 30 June 2019

Accounts receivable are initially recognised at Fair Value less any provision for impairment. Refer to Note 1 e. further details on the determination of impairment loss.

i. Revenue and Other Income

Revenue is measured at Fair Value of the consideration received or receivable after taking into account any discounts and volume rebates applicable. Any consideration deferred is treated as the provision of finance and is discounted at a rate of interest that is generally accepted in the market for similar arrangements. The difference between the amount initially recognised and the amount ultimately received is treated as interest revenue.

Revenue from the sale of goods and/or provision of services is recognised at the point of delivery as this corresponds to the transfer of the significant risks and rewards of ownership of the goods and/or services to the customer and the cessation of all involvement with those goods and/or services by the Academy.

Interest revenue is recognised using the effective interest rate method which, for floating rate financial assets, is the rate inherent in the instrument. Dividend revenue is recognised when the right to receive the dividend has been established.

Government grant income is recognised by reference to the stage of completion of the activity related to the grant as at the end of the reporting period. The residual portion of the grant is recognised as Unearned Income.

j. Goods and Services Tax (GST)

Revenues, expenses, assets and liabilities are recognised net of the applicable amount of GST except where the amount of GST incurred is not recoverable from the Australian Taxation Office. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of the item of expense. Receivables and payables in the Statement of Financial Position are inclusive of GST.

Cash flows are presented in the Statement of Cash Flows on a gross basis except for the GST components relating to Investing and Financing activities. In this case, the GST components are disclosed under the Operating cash flows.

k. Comparative Figures

When required by the Australian Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

l. Trade and Other Payables

Trade and other payables represent an outstanding liability at the end of the reporting period for goods and/or services received by the Academy during the reporting period and which remain unpaid. The balance is recognised as a current liability with the amounts normally being paid within 30 days of the recognition of the liability.

Academy of the Social Sciences in Australia Inc
Notes to the Financial Statements
for the year ended 30 June 2019

m. Provisions

Provisions are recognised when the Academy has a legal or constructive obligation, as the result of past events, for which it is probable that an outflow of economic benefits, normally cash, will result and that outflow can be reliably measured. Provisions so recognised represent the best estimate of the amounts required to settle the obligation as at the end of the reporting period.

The Academy holds a Provision for Bad and Doubtful Debts. This is calculated using historical debt write-offs. The Write Off of debts has only been in regard to Fellows being suspended for unpaid memberships fees and, based on this historical data, the provision has been determined to be 5% of the outstanding balance of membership fees as at 30 June each year.

n. Strategic Initiatives Reserve

The Strategic Initiatives Reserve (previously Strategic Initiatives Fund held as an Unearned Income Liability) identifies funds set aside from Retained Earnings by the Executive Committee. The Executive Committee may commit some or all of the Reserve to fund specific projects and activities that are outside the on-going activities of the Academy.

o. Key Estimates and Judgements

The Academy assesses impairment at the end of each reporting period by the evaluation of conditions and events specific to the group that may be indicative of impairment triggers. Recoverable amounts for the relevant assets are reassessed using value-in-use calculations which incorporate various key assumptions.

p. New Accounting Standards for Application in Future Periods

Two new Accounting Standards, or changes to existing Accounting Standards, come into effect as at 1 July 2019. These standards are *AASB 16 - Leases* and *AASB 15 - Revenue*.

AASB 15 requires that revenue only be recognised when there is a clear and unrevocable right to retain the funds. Where funds are received that are tied to a future delivery of service and/or goods, the revenue is not to be recognised until those services and/or goods are delivered. As this is the model under which the Academy has operated for some time, the change to AASB 15 is unlikely to have effect.

AASB 16 does provide relief for Not-For-Profit entities such that the lease payments for the national office at 26 Balmain Crescent, Acton, ACT can be treated as a lease expense (the Academy is not required to treat the lease as a Finance Lease).

AASB 16 also allows a Not-For-Profit entity to set a threshold value for equipment under lease, such as an office Multi Function Device. Assets under lease and below this threshold do not have to be treated as a Finance Lease. In this regard, the Academy will be applying a \$10,000 threshold for leased equipment.

	Less Provision for Doubtful Debts	(1,003)	-
	Total Aged Receivables:	23,079	31,596

Current trade receivables are non interest bearing and are generally receivable within 30 days.
Membership subscriptions are generally receivable within 90 days.

A Provision for Impairment is recognised against member subscriptions where there is objective evidence that a member subscription is impaired (ie unlikely to be paid) and the sum of the impaired amounts would be significant. The Provision is set at 5% of the outstanding Subscriptions Receivable as at 30 June each year. The impairment as at 30 June 2019 is \$1,003 (30 June 2018: Nil).

Credit Risk

The main source of credit risk to the Academy is considered to relate to member subscriptions receivable. Based on historical data, the risk in regard to the payment of member subscriptions has been set at 5% of the balance outstanding as at 30 June each year.

- Greater than 5 years	-	-
Total lease payments payable:	269,602	7,965

Note 30 Contingent Liabilities and Contingent Assets

There are no known contingent liabilities nor contingent assets at the date of this report that should be brought to account or disclosed.

Note 31 Events After the Balance Sheet Date

No matters nor circumstances have arisen since the end of the period which significantly affected, or may affect, the operations of the Academy, the results of those operations or the state of affairs of the Academy in future periods.

Note 32 Related Party Transactions

Transactions between related parties are on normal commercial terms and conditions no more favourable than those available to other parties unless otherwise stated.

The membership of the Academy includes delegates from participating organisations, individuals and associates. These are deemed to be related parties.

Other than the receipt of membership subscriptions, no related party transactions arose during the 2018-19 financial year (2017-18: Nil).

Note 33 Key Management Personnel

Key management personnel is defined by AASB 124 "Related Party Disclosures" as those persons having authority and responsibility for planning, directing and controlling the activities of the Academy directly or indirectly.

Employment conditions for all staff are guided by the Australian National University Enterprise Agreement. Details of the remuneration of those staff meeting the definition are available upon the consent of the Committee.

Committee members did not receive remuneration or any benefits other than reimbursement of travel expenses.

Note 34 Financial Instruments

The Academy's financial instruments consist mainly of deposits with banks, local money market instruments, short term investments, accounts receivable and payable and leases.

The totals for each category of financial instruments, measured in accordance with AASB 139 and as detailed in the accounting policies as detailed at Note 1 to these financial statements, are as follows:

Financial Assets

Cash and cash equivalents	1,411,591	1,562,366
Trade and other receivables	23,079	47,320

Total Financial Assets:

1,434,670	1,609,687
-----------	-----------

Financial Liabilities

Trade and other payables	37,007	266,033
--------------------------	--------	---------

Financial Risk Management Policies

The Academy's Treasurer is responsible for, among other issues, the monitoring and management of financial risk exposures of the Academy. The Treasurer monitors the Academy's transactions and reviews the effectiveness of controls relation to credit risk, financial risk and interest rate risk.

Discussions on the monitoring and management of financial risk exposures are held three times (3) per annum and minuted by the Executive Committee

The Academy's overall risk management strategy seeks to ensure that the Academy meets its financial targets whilst minimising potential adverse effects of a cash flow shortfall.

Notes to the Financial Statements
for the year ended 30 June 2019

	2018-19	2017-18
	Budget	Full Year
	\$	\$

Specific Financial Risk Exposures and Management

The main risks the Academy is exposed to through its financial instruments are Credit Risk, Liquidity Risk and Market Risk relating to interest rate and equity price risks.

a. Credit Risk

Exposure to Credit risk relating to financial assets arises from potential non-performance by counterparties of contract obligations that could lead to a financial loss by the Academy.

Credit Risk is managed through apply policies and precedures such as systems for the approval, granting and removal of credit limits, monitoring of exposure against limits and monitoring of the financial stability of significant customers and counterparties. This ensures that, to the extent possible, members and counterparties to transactions are of sound credit worthiness.

Note 35 Restatement of Prior Period Error

Amounts previously recognised as liabilities to the Academy have subsequently been assessed as appropriations of profit and, in turn, should have been treated as a Reserve. The creation of the Strategic Initiatives Reserve should have, in effect, been done so in the 2012-13 financial year.

An adjustment has been made to the 2017-18 opening balances for this financial report in accordance with *AASB108 - Accounting Policies, Changes in Accounting Estimates and Errors*.

The adjustment to the Opening Balance for the 2017-18 Equity balance is shown below.

	2017-18 Opening Equity Balance		
	As reported	Adjustment	Adjusted Balance
Retained Earnings	789,890	(115,286)	674,604
Strategic Initiatives Reserve	-	115,286	115,286
Total Equity	789,890	-	789,890

INDEPENDENT AUDITOR'S REPORT TO THE ACADEMY OF THE SOCIAL SCIENCES IN AUSTRALIA INCORPORATED

Report on the Audit of the Financial Report

Opinion

I have audited the financial report of the Academy of the Social Sciences in Australia Incorporated (the *Academy*), which comprises the statement of financial position as at 30 June 2019, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the Responsible Person's Declaration.

In my opinion the financial report of the Academy of the Social Sciences in Australia Incorporated has been prepared in accordance with Division 60 of the *Australian Charities and Not-for-profits Commission Act 2012*, including:

- a) giving a true and fair view of the Academy's financial position as at 30 June 2019 and of its financial performance for the year then ended; and
- b) complying with Australian Accounting Standards and Division 60 of the Australian Charities and Not-for-profits Commission Regulation 2013.

Basis for Opinion

I conducted my audit in accordance with Australian Auditing Standards. My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of my report. I am independent of the Academy in accordance with the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants* (the *Code*) that are relevant to my audit of the financial report in Australia. I have also fulfilled my other ethical responsibilities in accordance with the *Code*.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis my opinion.

Other Information

The Committee is responsible for any other information which reports on the financial position or annual financial performance of the Academy. The other information comprises that included in external reports prepared by the Academy and made available to the public such as the Annual Report, but does not include the financial report and my auditor's report thereon.

My opinion on the financial report does not cover the other information and accordingly I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial report, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or my knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work I have performed, I conclude that there is a material misstatement of this other information, I am required to report that fact. I have nothing to report in this regard.

Responsibilities of Committee for the Financial Report

The Committee of the Academy is responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards and the ACNC Act, and for such internal control as the Committee determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Committee is responsible for assessing the Academy's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Committee either intends to liquidate the Academy or to cease operations, or has no realistic alternative but to do so.

The Committee is responsible for the Academy's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Report

My objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

As part of an audit in accordance with the Australian Auditing Standards, I exercise professional judgement and maintain professional scepticism throughout the audit.

I also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Academy's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Academy.
- Conclude on the appropriateness of the Academy's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Academy's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Academy to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

I communicate with the Academy regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including when considered necessary any significant deficiencies in internal control that I identify during my audit.
